PREFACE

The Yearbook of Statistics provides comprehensive and up-to-date information on the economic and social characteristics of Malaysia. The publication presents statistics on a wide array of topics which include population, external trade, employment, prices, national accounts, education, health, environment as well as data for the various sectors of the economy.

Some key indicators, accompanied by graphs and charts, are presented at the beginning of the publication to provide users with a quick understanding of the basic trends of the economy.

It is hoped that the Yearbook of Statistics will serve as a useful and convenient reference on the socio-economic situation of the country. More detailed statistics can be obtained in other specialized publications of the Department. All comments and suggestions towards improving future publications would be greatly appreciated.

IKLIM

Climate

2. IKLIM

Data iklim dikumpul oleh Jabatan Meteorologi Malaysia melalui cerapan secara berkala di 34 buah stesen Meteorologi utama. Stesen-stesen tersebut dilengkapi dengan sistem pencerapan cuaca automatik. Elemen-elemen cuaca yang dicerap adalah tekanan atmosfera, hujan, suhu, kelembapan udara, arah dan halaju angin, sinaran suria, sejatan, keadaan awan dan ketampakan.

Alat-alat meteorologi digunakan untuk mencerap cuaca adalah :

- i) *Digital Barometer*
- ii) *Platinum Resistance Temperature Sensor*
- iii) *Wind anemometer and wind vane*
- iv) *Tipping Bucket Raingauge*
- v) *Evaporation Pan US Class A*
- vi) *Pyranometer Kipps and Zonen*
- vii) *Sunshine Recorder Campbell-Strokes*

Definisi

Cuaca adalah keadaan atmosfera pada suatu masa dan tempat yang tertentu.

Iklim adalah himpunan keadaan cuaca harian dan musim bagi suatu tempoh masa yang panjang biasanya melebihi 30 tahun.

Hari hujan ialah hari dimana jumlah hujan yang direkod adalah sama atau melebihi 0.1 mm.

2. CLIMATE

Climatic data are compiled by Malaysian Meteorological Department through routine weather observations at 34 principal Meteorological stations. These stations are fully equipped with automatic weather observation system. The various weather element observed includes atmospheric pressure, rainfall, temperature, relative humidity, wind speed and direction, solar radiation and evaporation.

The commonly used meteorological instruments for weather observations are:

- i) Digital Barometer*
- ii) Platinum Resistance Temperature Sensor*
- iii) Wind anemometer and wind vane*
- iv) Tipping Bucket Raingauge*
- v) Evaporation Pan US Class A*
- vi) Pyranometer Kipps and Zonen*
- vii) Sunshine Recorder Campbell-Strokes*

Definition

Weather is the condition of atmosphere at any particular time and place.

Climate is the accumulation of daily and seasonal weather events of a long period of time such as over 30 years.

Rain day is a day with rainfall amount equals to or exceeds 0.1 mm.

3. PENDUDUK DAN PERANGKAAAN PENTING

PENGENALAN

Seksyen ini mengandungi dua bahagian; bahagian pertama adalah berkaitan dengan struktur penduduk dan taburannya. Kebanyakan data yang dipersembahkan dalam bahagian ini adalah daripada banci penduduk. Anggaran bagi tahun 2003 dan seterusnya adalah berdasarkan kepada data Banci Penduduk dan Perumahan 2000 yang dikemaskinikan dengan maklumat kelahiran dan kematian. Bahagian kedua mempamerkan data bagi dua komponen utama perubahan penduduk, iaitu kelahiran dan kematian.

KONSEP

Anggaran Penduduk

Data tentang saiz, struktur, taburan dan kepadatan penduduk bagi tahun-tahun 1991 dan 2000 telah dipersembahkan dalam Jadual 3.1 hingga 3.6. Jadual-jadual ini telah disusun daripada perangkaan berdasarkan maklumat yang telah dipungut dalam banci-banci penduduk.

Anggaran penduduk pertengahan tahun bagi tahun-tahun 2003, 2004, 2005, 2006 dan 2007 ditunjukkan dalam Jadual 3.7 hingga 3.9. Anggaran penduduk tersebut adalah berdasarkan kepada data Banci Penduduk dan Perumahan 2000 yang terlebih dahulu telah disesuaikan untuk kurang penghitungan berasaskan kadar-kadar kurang penghitungan, dari Penyiasatan Penilaian Liputan Banci.

Komponen Perubahan Penduduk

Jadual 3.10 hingga 3.13 mempersembahkan data tentang pertambahan semula jadi, bilangan kelahiran hidup, kematian, kematian bayi dan kadar-kadarnya masing-masing bagi tempoh 2003 hingga 2007. Jadual 3.14 dan 3.15 mempersembahkan data tentang sebab kematian bagi tahun 2001 dan 2004 manakala Jadual 3.16 mempersembahkan data tentang jangkaan hayat bagi tempoh 2003 hingga 2007.

Definisi bagi beberapa istilah yang telah digunakan adalah seperti berikut :

Bandar : Definisi Banci 1991 dan 2000

Kawasan diwartakan serta kawasan tepu bina yang bersempadan dengannya dan gabungan kedua-duanya mempunyai jumlah penduduk seramai 10,000 orang atau lebih semasa Banci 1991 dan 2000. Kawasan tepu bina ditakrifkan sebagai kawasan yang terletak bersebelahan dengan kawasan yang diwartakan dan mempunyai sekurang-kurangnya 60 peratus penduduk (berumur 10 tahun dan lebih) yang terlibat dalam aktiviti bukan pertanian dan mempunyai kemudahan tandas moden di dalam unit-unit perumahan mereka.

3. POPULATION AND VITAL STATISTICS

INTRODUCTION

This section consists of two parts; the first is concerned with population structure and its distribution. Most of the data presented in this part are from the population censuses. Estimates for the year 2003 onwards are based on data from the 2000 Population and Housing Census and updated with information on births and deaths. The second part presents data on two main components of population change, that is, births and deaths.

CONCEPTS

Population Estimates

Data on population size, structure, distribution and density for the years 1991 and 2000 are presented in Tables 3.1 to 3.6. The tables have been compiled from statistics based on information collected in the population censuses.

Mid-year population estimates for the years 2003, 2004, 2005, 2006 and 2007 are shown in Tables 3.7 to 3.9. These population estimates are based on the 2000 Population and Housing Census data which had earlier been revised for under-enumeration based on under-enumeration rates from the Census Coverage Evaluation Survey.

Components of Population Change

Tables 3.10 to 3.13 present data on natural increase, the number of live births, deaths, infant deaths and their respective rates for the period 2003 to 2007. Tables 3.14 and 3.15 present data on causes of death for the year 2001 to 2004 whilst Table 3.16 presents data on life expectancy for the period 2003 to 2007.

Definitions of some of the terms used are as follows :

Urban : 1991 and 2000 Census Definition

Gazetted areas with their adjoining built-up areas which had a combined population of 10,000 or more at the time of the 1991 and 2000 Censuses. Built-up areas were areas contiguous to a gazetted area and had at least 60 percent of their population (aged 10 years and over) engaged in non-agricultural activities as well as having modern toilet facilities in their housing units.

Crude Birth Rate : The ratio of the number of live births during a year to the mid-year population in that year. (Per thousand population).

Crude Death Rate : The ratio of the number of deaths during a year to the mid-year population in that year. (Per thousand population).

Crude Rate of Natural Increase : Crude birth rate minus crude death rate. (Per thousand population).

Infant Mortality Rate : The ratio of the number of deaths of infants under 1 year of age in a given year to the total number of live births in that year. (Per thousand live births).

4. PERTANIAN

PENGENALAN

Perangkaan tanaman pertanian meliputi maklumat bagi tanaman utama, ternakan, perhutanan dan perikanan.

Tanaman utama terdiri dari getah, kelapa sawit, kelapa, koko dan padi. Maklumat tanaman utama dikemukakan mengikut sektor estet dan pekebun kecil, sementara bagi tanaman padi maklumat adalah mengikut jenis padi dan musim penanaman.

Maklumat ternakan meliputi bilangan ternakan dan penyembelihan bagi ternakan seperti lembu, kerbau, kambing, biri-biri dan khinzir. Maklumat perhutanan meliputi keluasan hutan dan pengeluaran kayu balak serta kayu gergaji. Maklumat perikanan pula terdiri dari bilangan nelayan, vesel menangkap ikan dan perkakas yang dilesenkan, pendaratan ikan laut mengikut kumpulan perkakas serta keluasan dan pengeluaran dari akuakultur.

KONSEP

Sumber maklumat pertanian dalam bahagian ini adalah seperti yang dicatat di bawah setiap jadual. Maklumat yang lebih terperinci boleh diperolehi dari penerbitan yang berkaitan. Bagaimanapun untuk memudahkan rujukan, definisi asas bagi istilah yang diguna adalah seperti di bawah.

GETAH / KELAPA SAWIT / KELAPA / KOKO

Estet-Eстет

Sesebuah estet getah / kelapa sawit / kelapa / koko adalah ditakrifkan seperti berikut :

- (i) semua kawasan bersambungan atau berpecah-pecah, seluas tidak kurang daripada 40.47 hektar (100 ekar), ditanam dengan sesuatu tanaman atau di mana penanaman tanaman tersebut dibenarkan dan di bawah satu hak milik yang sah.
- (ii) atau mana-mana keluasan yang ditanam dengan sesuatu tanaman tersebut di estet yang telah sedia ada.

Kebun-Kebun Kecil

Sesebuah kebun kecil getah / kelapa sawit / kelapa / koko ditakrifkan sebagai semua kawasan, bersambungan atau berpecah-pecah, seluas kurang daripada 40.47 hektar (100 ekar), ditanam dengan sesuatu tanaman atau di mana penanaman tanaman tersebut dibenarkan dan di bawah satu hak milik yang sah. Walau bagaimanapun, rancangan-rancangan kemajuan tanah (FELDA, FELCRA dan sebagainya) adalah dimasukkan sebagai kebun kecil walaupun ada di antara rancangan kemajuan tanah dan mungkin secara individu mempunyai keluasan lebih daripada 40.47 hektar (100 ekar).

Pengeluaran Getah Asli

Pengeluaran getah asli merujuk kepada kandungan getah kering (KGK) susu getah cair, skrap dan getah keping yang dihasilkan oleh estet dan pekebun kecil pada bulan rujukan. Sementara pengeluaran estet diperoleh terus dari estet, pengeluaran kebun kecil pula dianggap bersamaan dengan pembelian oleh pemproses getah melalui peniaga getah daripada pekebun kecil pada bulan berkenaan.

Purata Keluasan (Getah) Ditoreh

Ia adalah purata keluasan di bawah getah matang yang telah ditoreh termasuk kawasan yang "direhatkan" di bawah sistem giliran torehan.

Keluasan Pengeluaran (Kelapa Sawit, Kelapa, Koko)

Ini adalah keluasan kawasan yang dipungut hasilnya di sepanjang dua belas bulan dalam tahun tersebut.

Keluasan Matang

Keluasan yang ditanam dengan getah, kelapa sawit, kelapa atau koko sama ada telah ditoreh atau dipungut hasilnya atau dianggap sudah boleh ditoreh atau dipungut hasilnya oleh pemilik estet atau orang yang mengemukakan penyata.

Keluasan Muda

Keluasan yang ditanam dengan getah, kelapa sawit, kelapa atau koko yang belum boleh ditoreh atau dipungut hasilnya oleh pemilik estet atau orang yang mengemukakan penyata.

PADI

Musim Utama

Musim Utama ialah tempoh yang mana penanaman padi adalah yang paling sesuai berdasarkan iklim tempatan (musim hujan) dan tidak bergantung sepenuhnya kepada sistem pengairan. Untuk tujuan pentadbiran, Musim Utama ditakrifkan sebagai tempoh bila padi ditanam yang mana tarikh mula ditanam jatuh antara 1 hb. Ogos hingga 28 hb. / 29hb. Februari tahun berikutnya.

Luar Musim

Luar Musim adalah tempoh kering yang mana penanaman padi pada biasanya bergantung kepada sistem pengairan. Untuk tujuan pentadbiran, Luar Musim ditakrifkan sebagai tempoh bila padi ditanam yang mana tarikh mula ditanam jatuh antara 1 hb. Mac hingga 31 hb. Julai dalam tahun berkenaan.

Padi Sawah

Padi Sawah adalah jenis padi yang utama ditanam di Malaysia dan terdiri dari berbagai varieti padi.

Padi Huma

Padi Huma meliputi padi yang ditanam di tanah tinggi dan tanah rendah. Padi jenis ini banyak ditanam di negeri Sabah dan Sarawak.

4. AGRICULTURE

INTRODUCTION

Statistics pertaining to agriculture include data for main crops, data on livestock, forestry and fishing.

The main crops covered include rubber, oil palm, coconut, cocoa and paddy. Data on main crops are presented both for the estate and the smallholding sectors, while those on paddy are presented according to the types of paddy and by planting seasons.

Data on livestock include the population and slaughter of livestock namely, cattle, buffalo, goat, sheep and swine. As for forestry, the data include the forest area and the production of logs and sawn timber. The data pertaining to fishing include the number of fishermen, fishing vessels and licensed fishing gears, the landing of marine fish by gear group, area and production from aquaculture.

CONCEPTS

The sources of information on agriculture are as mentioned below each table. Detailed information may be obtained from publications of the respective sources. However, for ease of reference the basic definitions of the terms used are given below.

RUBBER / OIL PALM / COCONUT / COCOA

Estates

A rubber / oil palm / coconut / cocoa estate is defined as :

- (i) all areas, contiguous or non-contiguous, aggregating not less than 40.47 hectares (100 acres), planted with the crop or on which the planting of the crop is permitted and is under a single legal ownership.*
- (ii) any area planted with the crop in an already existing estate.*

Smallholdings

A rubber / oil palm / coconut / cocoa smallholding is defined as all areas, contiguous or non-contiguous, aggregating less than 40.47 hectares (100 acres) planted with the crop or on which the planting of the crop is permitted and is under a single legal ownership. However, land development schemes (FELDA, FELCRA and others) are included as smallholdings although some land schemes may individually be more than 40.47 hectares (100 acres).

Production of Natural Rubber

Production of natural rubber refers to the dry rubber content (DRC) of field latex, scrap and sheets produced by estates and smallholders during the reference month. While estate production is obtained directly from the estates, smallholding production is assumed to be equivalent to purchases by rubber processors through rubber dealers from smallholders during the month.

Average Tapped Area

This is the average area under mature rubber that had been tapped, including areas 'rested' under rotational system.

Hectareage in Production (Oil Palm, Coconut, Cocoa)

These are the hectareages harvested during the twelve months of the year.

Mature Area

The area of rubber, oil palm, coconut or cocoa which is either being tapped or harvested or is considered tappable or harvestable by the estate owner or persons submitting the returns.

Immature Area

The area of rubber, oil palm, coconut or cocoa which is considered by the estate owner or persons submitting the returns to be not yet tappable or harvestable.

PADDY

Main Season

Main Season is a period whereby paddy planting is very suitable based on local climate (rainy season) and does not depend wholly on irrigation system. For administrative purposes, Main Season is defined as the period when paddy is planted in which the commence date of planting falls between 1st August to 28/29th February of the following year.

Off-season

Off-season is a dry period and paddy planting normally depends on an irrigation system. For administrative purposes, Off-season is defined as the period when paddy is planted in which the commence date of planting falls between 1st March to 31st July of the year.

Wetland Paddy

Wetland paddy is the primary paddy type planted in Malaysia and comprises of different paddy varieties.

Dryland Paddy

Dryland paddy includes those planted in the highland and lowland. This type of paddy is commonly planted in Sabah and Sarawak.

5. PEMBUATAN, PEMBINAAN, PERLOMBONGAN, ELEKTRIK DAN INDEKS PENGELUARAN PERINDUSTRIAN

PENGENALAN

Bahagian ini membentangkan perangkaan utama bagi sektor Pembuatan, Pembinaan, Perlombongan dan Elektrik serta Indeks Pengeluaran Perindustrian. Data yang diberikan adalah mutakhir yang diperoleh pada masa percetakan penerbitan.

Data ini menerangkan komponen utama dan arah aliran dalam setiap sektor. Indeks Pengeluaran Perindustrian memberikan gambaran ringkas keadaan ketiga-tiga sektor Pembuatan, Perlombongan dan Elektrik, atau umumnya lebih dikenali sebagai sektor perindustrian.

Bagi memudahkan pemahaman berkaitan data, pengguna dinasihatkan supaya merujuk kepada nota di bawah untuk konsep dan definisi yang digunakan serta ulasan khusus yang diberikan dalam sesuatu jadual.

Sektor Pembuatan

Pembuatan ditakrifkan sebagai "penukaran secara mekanikal atau kimia ke atas bahan atau komponen menjadi produk baru sama ada kerja itu dilakukan oleh jentera yang digerakkan oleh kuasa atau tangan, sama ada dilakukan di kilang atau di rumah pekerja dan sama ada barang keluaran dijual secara borong atau runcit".

Data yang diterbitkan dalam Jadual 5.1, 5.2 dan 5.3 merujuk kepada data yang dikumpul melalui penyiasatan tahunan dan banci. Data yang diterbitkan dalam Jadual 5.4 merujuk kepada pengeluaran produk utama yang dikumpul melalui penyiasatan bulanan sektor pembuatan.

Sektor Pembinaan

Pembinaan bermaksud "pembinaan baru, pengubahsuaian, pembaikan dan perobohan. Pemasangan sebarang jenis jentera atau peralatan yang dipasang ketika pembinaan asal adalah diambil kira, demikian juga bagi pemasangan jentera atau peralatan selepas pembinaan asal tetapi memerlukan perubahan struktur bagi pemasangannya".

Perangkaan yang dikemukakan dalam Bahagian ini merujuk kepada pembinaan yang dijalankan oleh kontraktor-kontraktor berdaftar. Unit statistik yang digunakan adalah unit jenis aktiviti yang sama seperti unit pertubuhan tetapi tempat aktivitinya tidak dihadkan.

Jadual 5.5 dan 5.6 menunjukkan data sektor Pembinaan yang dikumpul melalui penyiasatan dan banci yang dijalankan dengan tujuan untuk menyediakan anggaran secara keseluruhan bagi Sektor Pembinaan. Bagi tahun rujukan 1996 dan 2005, banci telah dijalankan merangkumi semua pertubuhan pembinaan yang aktif manakala bagi tahun rujukan 1998, 2000, 2002 dan 2004, pertubuhan yang bernilai kerja RM 500,000 ke atas sahaja yang diliputi

Dalam Jadual 5.5, negeri yang dimaksudkan ialah 'negeri kerja', iaitu negeri yang mana nilai kerja pembinaan yang terbesar dilaporkan oleh kontraktor.

Sektor Perlombongan

Perlombongan secara umumnya adalah didefinisikan sebagai pengekstrakan, pembersihan dan pemanfaatan mineral semula jadi, berbentuk pepejal seperti arang batu dan bijih, berbentuk cecair seperti minyak mentah dan berbentuk gas seperti gas asli.

Bilangan lombong beroperasi seperti yang ditunjukkan dalam Jadual 5.9 adalah berbeza dengan yang ditunjukkan dalam Jadual 5.8. Ini kerana Jadual 5.9 hanya merujuk kepada bilangan unit lombong timah yang beroperasi pada akhir tahun rujukan mengikut permit lombong yang dikeluarkan oleh Jabatan Mineral dan Geosains Malaysia manakala dalam Jadual 5.8 pula merujuk kepada semua pertubuhan lombong timah yang beroperasi dalam tahun rujukan yang dimaksudkan dikumpul melalui banci perlombongan yang dikendalikan oleh Jabatan Perangkaan Malaysia.

Sektor Elektrik

Jadual 5.12 dan 5.13 menunjukkan jumlah penjanaan dan penggunaan tenaga elektrik di dalam negara. Jumlah bekalan ditunjukkan secara berasingan bagi pemasangan awam dan swasta. Data bagi tenaga elektrik yang dieksport / import merujuk kepada eksport / import tenaga elektrik ke / dari negara Thailand / Singapura.

Indeks Pengeluaran Perindustrian

Indeks Pengeluaran Perindustrian ialah satu ukuran kadar perubahan sebenar pengeluaran komoditi perindustrian bagi satu tempoh masa. Indeks dalam Bahagian ini merujuk kepada Malaysia. Indeks Pengeluaran Perindustrian meliputi sektor Pembuatan, Perlombongan dan Elektrik. Jadual 5.14 memberikan Indeks pada peringkat sektor bagi ketiga-tiga sektor yang berkenaan dan Jadual 5.15 memberi pada peringkat kumpulan bagi sektor Pembuatan. Formula *Laspeyres* dengan wajar tahun asas telah digunakan untuk mengira indeks tersebut.

Data bagi sektor Pembuatan diperoleh melalui Penyiasatan Bulanan industri Pembuatan dengan maklumat tambahan diperoleh daripada Lembaga Minyak Sawit Malaysia dan Jabatan Perhutanan.

KONSEP

Di bawah ini adalah takrif bagi istilah yang digunakan :-

Unit Melapor

Unit melapor bagi Penyiasatan/Banci ialah pertubuhan. Sebuah pertubuhan secara ideal ditakrifkan sebagai "satu unit ekonomi yang bergiat di bawah hak milik atau penguasaan tunggal, iaitu di bawah satu entiti yang sah. Ia menjalankan satu jenis aktiviti ekonomi atau mempunyai satu jenis aktiviti ekonomi utama di satu tempat / lokasi fizikal". Untuk sektor pembinaan, unit pelapor ialah unit jenis kegiatan. Ianya sama seperti sebuah pertubuhan tetapi tiada had berhubung dengan lokasi kegiatan. Untuk pertubuhan pelbagai kegiatan, beberapa kriteria tertentu telah digunakan bagi mengelaskan pertubuhan kepada industri yang sesuai. Apabila sesebuah pertubuhan, daripada segi nilai pengeluaran, terlibat dalam lebih daripada satu kegiatan yang penting, maka pertubuhan berkenaan diminta memberikan penyata yang berasingan bagi setiap kegiatannya. Sebaliknya, jika sesebuah pertubuhan itu menjalankan satu kegiatan penting sahaja maka kegiatan lainnya yang kurang penting akan dimasukkan ke dalam kegiatan yang penting itu dan seterusnya pertubuhan berkenaan dikelaskan mengikut industri bagi kegiatan penting tersebut.

Output Kasar : Output kasar ditakrifkan dengan memasukkan unsur-unsur berikut:

Nilai jualan produk pembuatan harga pengeluar

- + Nilai barang yang dijual dalam keadaan yang sama seperti dibeli
- Kos barang yang dijual dalam keadaan yang sama seperti dibeli
- + Perbelanjaan modal ke atas binaan sendiri
- + Pendapatan daripada perkhidmatan perindustrian yang diberi kepada orang lain
- + Pendapatan daripada kerja perindustrian lain (misalnya, pembinaan, kuari, dll.)
- + Penerimaan bayaran daripada skrap, tenaga elektrik, produk sisa dll. yang dijual kepada orang lain
- + Penerimaan komisen dan brokeraj

- + Semua nilai output lain (seperti penerimaan perkhidmatan bukan perindustrian, misalnya bayaran pengurusan, sewa harta, dll.)
- + Stok akhir barang siap (pembuatan sendiri)
- Stok awal barang siap (pembuatan sendiri)
- + Stok akhir barang dalam proses
- Stok awal barang dalam proses

Kos Input ¹

: Kos input dinilai pada harga pembeli semasa dan ditakrifkan dengan memasukkan unsur-unsur berikut:

Nilai bahan mentah dan bekalan yang digunakan

- + Kos kerja perindustrian yang dibuat oleh orang lain
- + Kos bahan dan bekas pembungkus yang digunakan
- + Tenaga elektrik dan air yang dibeli
- + Nilai bahan pembakar, pelincir dan gas yang digunakan
- + Kos bahan yang digunakan bagi pembaikan dan penyelenggaraan harta tetap (termasuk pembayaran kepada pihak lain ke atas kerja ini)
- + Perbelanjaan penyelidikan dan pembangunan
- + Semua kos input lain (termasuk kos latihan dan nilai pakaian percuma yang disediakan kepada pekerja)

Nilai Tambah Banci

Nilai tambah banci diperolehi daripada perbezaan di antara nilai output kasar dengan kos input banci. Walau bagaimanapun, bagi tahun rujukan 2005, konsep nilai tambah adalah berbeza dengan memasukkan bayaran terhadap perkhidmatan bukan perindustrian sebagai kos input.

¹ Bagi tahun rujukan 2005. Kos Input termasuk Bayaran terhadap perkhidmatan bukan perindustrian

Bilangan Pekerja pada Akhir Tahun

Ini merujuk kepada jumlah bilangan orang yang diambil bekerja dalam bulan Disember atau pada tempoh pembayaran gaji terakhir bagi satu-satu tahun rujukan. Ia termasuk semua pemilik yang bekerja, rakan niaga yang aktif dan pekerja keluarga tidak bergaji serta pekerja bergaji, sepenuh masa dan sambilan.

(i) Pemilik yang bekerja dan rakan niaga yang aktif

Ia ditakrifkan sebagai semua pemilik perseorangan dan rakan niaga sambilan atau sepenuh masa, yang bekerja dengan aktif dalam pertubuhan itu, tidak termasuk rakan niaga yang tidak aktif.

(ii) Pekerja keluarga tidak bergaji

Ia ditakrifkan sebagai semua ahli isi rumah kepada mana-mana pemilik pertubuhan yang melaksanakan kerja tertentu (sepenuh masa atau sambilan) dan bekerja sekurang-kurangnya satu pertiga daripada waktu bekerja biasa yang diamalkan oleh pertubuhan berkenaan tanpa mendapat bayaran secara '*regular*', sama ada dalam bentuk wang tunai atau manfaat bagi kerja yang dilakukan. Biasanya pekerja berkenaan memperoleh makanan, tempat tinggal dan bantuan lain sebagai anggota daripada isi rumah pemilik tersebut dan terus memperoleh kemudahan berkenaan sama ada ia bekerja atau tidak di dalam pertubuhan itu.

(iii) Pekerja sepenuh masa

Ia ditakrifkan sebagai semua pekerja bergaji yang bekerja sekurang-kurangnya 6 jam sehari dan sekurang-kurangnya 20 hari sebulan.

(iv) Pekerja sambilan

Ia ditakrifkan sebagai semua pekerja bergaji yang bekerja kurang daripada 6 jam sehari dan / atau kurang daripada 20 hari sebulan.

Gaji dan Upah yang Dibayar

Gaji dan upah yang dibayar merujuk kepada pembayaran tunai, termasuk bonus, komisen, bayaran lebih masa, elaun kos sara hidup dan elaun dan lain-lain yang dibayar kepada semua pekerja bergaji dalam tempoh tahun rujukan. Caruman pekerja kepada Kumpulan Wang Simpanan Pekerja (KWSP) dan Pertubuhan Keselamatan Sosial (PERKESO) turut dimasukkan, tetapi caruman oleh majikan dikecualikan. Elaun kepada pemilik yang bekerja, rakan niaga yang bekerja dan pekerja keluarga tidak bergaji juga dikecualikan.

Nilai Harta yang Dimiliki pada Akhir Tahun

Harta meliputi semua barangan baru atau terpakai, yang mempunyai hayat produktif lebih daripada setahun (seperti tanah, bangunan, jentera dan alat kelengkapan, termasuk kelengkapan pengangkutan). Nilai yang dilaporkan adalah seperti pada penghujung tahun mengikut buku akaun unit yang melapor. Ia termasuk perolehan baru sepanjang tahun berkenaan tetapi tidak termasuk harta yang dihapuskan pada tahun tersebut Ia adalah nilai bersih setelah ditolak susut nilai.

Pengelasan Edaran Tenaga Elektrik Mengikut Jenis Pengguna

Pengelasan edaran mengikut jenis pengguna adalah berdasarkan kepada pengelasan Tenaga Nasional Berhad. Jenis pengguna yang dikelaskan di bawah setiap kategori adalah seperti berikut :-

- Kediaman : Pengguna yang menduduki rumah kediaman persendirian yang tidak digunakan sebagai hotel, rumah penginapan atau untuk sebarang perniagaan, perdagangan, profesional atau perkhidmatan.
- Perdagangan : Termasuk pengguna yang menduduki blok pejabat, kedai, gudang, restoran, sekolah, hotel, rumah penginapan ladang, pelabuhan, pemasangan keretapi, pemasangan angkatan tentera dan kerajaan dan hospital.
- Perindustrian : Termasuk pengguna di dalam industri pembuatan, penggalian batu dan pengguna yang menggunakan tenaga untuk tujuan mengepam air.
- Lampu Awam : Termasuk lampu jalan, lampu isyarat, lintasan keretapi, pondok-pondok telefon, isyarat lalulintas dan untuk tujuan pencahayaan umum dan awam lain.

5. MANUFACTURING, CONSTRUCTION, MINING, ELECTRICITY AND INDEX OF INDUSTRIAL PRODUCTION

INTRODUCTION

This Section presents the principal statistics of the Manufacturing, Construction, Mining and Electricity sectors and also the Index of Industrial Production. The data given are the latest available at the time of printing the publication.

The data describe the main components and trends in each of the sectors. The Index of Industrial Production attempts to summarize the behaviour of three sectors i.e. Manufacturing, Mining and Electricity, more commonly referred to as the industrial sector.

For a better understanding of the data, users are advised to refer to the notes below for concepts and definitions used as well as comments given specifically for each table.

Manufacturing Sector

Manufacturing is defined as the “physical or chemical transformation of materials or components into new products, whether the work is performed by power-driven machines or by hand, whether it is done in the factory or in the workers’ homes, and whether the products are sold at wholesale or retail”.

The data published in Tables 5.1, 5.2 and 5.3 refer to data canvassed through annual surveys and censuses. Data published in Table 5.4 refer to the production of major products canvassed through a monthly survey of the manufacturing sector.

Construction Sector

Construction refers to “new construction, alteration, repairs and demolition. Installation of any machinery or equipment which is built-in at the time of the original construction is included, as well as installation of machinery or equipment after the original construction but which requires structural alteration in order to install”.

The statistics given in this Section refer to construction work done by registered contractors. The statistical unit is the kind-of-activity unit which is the same as the establishment but with no restrictions imposed with regard to location of activity.

Tables 5.5 and 5.6 show data on the Construction sector collected through surveys and censuses. For reference year 1996 and 2005, a census covering all contractors was conducted, while for reference years 1998, 2000, 2002 and 2004, establishments with a value of work done of RM500, 000 and above were covered.

In Table 5.5, the state referred to is the ‘work state’ that is, the state in which most of the construction work was reported by the contractor.

Mining Sector

Mining generally is defined as the “extraction, dressing and beneficiating of minerals occurring naturally as solids, such as coal and ores, liquids such as crude oil and gases such as natural gas”.

The number of operating mines shown in Table 5.9 is different from that shown in Table 5.8. This is because Table 5.9 refers to the number of operating tin mining units at the end of the specific year according to mining permits issued by the Department of Minerals and Geoscience, Malaysia, where in Table 5.8 refers to all tin mining establishments that operated in the specific reference year collected through a Census of Mining Industries conducted by Department of Statistics, Malaysia.

Electricity Sector

Tables 5.12 and 5.13 show total generation and consumption of electricity in the country. The total supply is shown separately for public and private installations. The data on electricity exported / imported refer to the export / import of electricity to / from Thailand / Singapore.

Index of Industrial Production

The Index of Industrial Production is a measure of the rate of change in the production of industrial commodities in real term over time. The indices given in this Section refer to Malaysia as a whole. The Index of Industrial Production covers the Manufacturing, Mining and Electricity sectors. Table 5.14 gives the indices at the sectoral level for each of the three sectors and Table 5.15 provide data at the group level for the Manufacturing Sector. The base year weighted Laspeyres formula is used to calculate the indices.

Data on the Manufacturing sector is canvassed through a Monthly Survey of Manufacturing industries, with information supplemented by the Malaysian Palm Oil Board (MPOB) and the Forestry Department.

CONCEPTS

Below are the definitions of some of the terms used in this section of the report: -

Reporting Unit

The reporting unit for the Survey/Census is the establishment. An establishment is ideally defined as an economic unit that engages, under a single ownership or control, that is, under a single legal entity, in one, or predominantly one, kind of economic activity at a single physical location". For the construction sector, the reporting unit is the kind-of-activity unit. It is the same as an establishment but there is no restriction imposed with regard to the location of the activity. For multi-activity establishments, certain criteria were used to classify the establishment to the appropriate industry. When an establishment was involved in more than one significant activity, in terms of value, then the establishment was requested to submit separate returns for each activity. When the establishment was involved in only one significant activity, then the rest of the activities were subsumed under this activity and the establishment was classified to the industry of the significant activity.

Value of Gross Output : *Value of Gross Output is defined to include the following elements:*

- Value of sales of manufactured products at producers' price*
- + *Value of goods sold in the same condition as purchased*
- *Cost of goods sold in the same condition as purchased*
- + *Capital expenditure on own construction*
- + *Income from industrial services rendered to others*
- + *Income from other industrial work done (e.g. construction, quarry, etc.)*
- + *Receipt from scrap, electricity, waste product, etc. sold to others*
- + *Receipt from commission and brokerage earned*
- + *Rental incomes received from non-residential building (office, factory, store, etc.)*
- + *All other output (such as receipt from non-industrial services, e.g. management fees received, income from rental or property, etc.)*
- + *Closing stock of finished goods (own manufactured)*
- *Opening stock of finished goods (own manufactured)*
- + *Closing stock goods- in- process*
- *Opening stock goods- in- process*

Cost of Input² : *The cost of input is in current purchasers' prices and is defined to include the following elements:-*

- Value of raw materials and supplies consumed*
- + *Cost of industrial work done by others*
- + *Cost of packing materials and containers consumed*
- + *Electricity and water purchased*
- + *Value of fuel, lubricants and gas consumed*
- + *Cost of materials used for repairs and maintenance of assets (including payments to others for this work)*

² For reference year 2005, Cost of Input includes Payments for non-industrial services.

- + *Research and development expenditure*
- + *All other input costs (including training and value of free wearing apparel provided for workers)*

Census Value Added

Census value added is derived as the difference between gross output and cost of input. However, for reference year 2005, the concept of value added is different by the inclusion of non-industrial services as cost of input.

Number of Persons Engaged as at End of Year

This refers to total number of persons engaged in the establishment during December or the last pay period of the reference year. It includes all working proprietors, active partners and unpaid family workers together with employees, both full-time and part-time.

(i) Working proprietors and active business partners

This category refers to all individual proprietors and partners, part-time or full-time who are actively engaged in the work of the establishments. It excludes silent and inactive partners.

(ii) Unpaid family workers

This is defined as all persons (full-time or part-time) of the household of any of the owners of the establishment who perform a specified job and work for a minimum of one third of the normal working time of the establishment, but do not receive regular payment either in cash or in kind for the work done. Such workers generally receive food, shelter and other support as part of the household of an owner but these provisions would continue whether they worked in the establishment or not.

(iii) Full-time employees

This is defined as all paid workers who work for at least 6 hours a day and for at least 20 days a month.

(iv) Part-time employees

This is defined to include all paid workers who work for less than 6 hours a day and / or less than 20 days a month.

Salaries and Wages Paid

Salaries and wages paid refer to cash payments, including bonuses, commissions, overtime wages, cost of living allowance and other allowance made to all paid workers during the reference year. The employees' contribution to Employees Provident Fund (EPF) and Social Security Organization (SOCSO) is included but the employers' contribution is excluded. Allowances to working proprietors, working partners and unpaid family workers are not included.

Value of Assets Owned as at End of Year

Assets cover all goods, new or used, that have a normal economic life of more than one year (e.g. land, buildings, machinery and equipment including transport equipment). The value reported is as at the end of year and is according to the books of accounts of the reporting unit. It includes additions during the year and excludes assets disposed off during the year. It is net of depreciation.

Classification of Distribution of Electricity by Type of Consumers

The classification of distribution by type of consumers is based on the Tenaga Nasional Berhad's classification. The types of consumer classified under each category are as follows: -

- Domestic :* *A consumer occupying a private dwelling which is not used as a hotel, boarding house or used for the purpose of carrying out any business, trade, profession or service.*
- Commercial:* *Includes a consumer occupying an office block, shop, godown, restaurant, school, hotel, boarding house, estate, port, railway installation, military and Government installation and hospital.*
- Industrial:* *Includes a consumer who is in the manufacturing, quarrying business and a consumer who utilizes energy for the purpose of pumping water.*
- Public Lighting:* *Includes street lighting, traffic lights, railway crossings, telephone kiosks, traffic signs and in respect of other general and public lighting purposes.*

TAKRIF-TAKRIF BAGI ISTILAH-ISTILAH YANG DIGUNAKAN

Berikut adalah takrif-takrif bagi istilah-istilah yang digunakan di dalam laporan ini.

Unit Melapor - Pertubuhan

Banci / penyiasatan ini dilaksanakan dengan menggunakan pendekatan pertubuhan. Pertubuhan ditakrifkan sebagai **'satu unit ekonomi yang bergiat dalam satu aktiviti di bawah pengawasan tunggal dan beroperasi di satu lokasi fizikal.'** Setiap pertubuhan diberikan klasifikasi industri yang berbeza berdasarkan aktiviti utamanya dan bukannya

mengikuti aktiviti syarikat induk. Pertubuhan yang beroperasi lebih dari satu lokasi perlu mengisi borang soal selidik yang berasingan bagi setiap stor, kilang atau kedai mereka. Dari itu secara konsepnya bagi entiti yang mempunyai pelbagai aktiviti, unit-unit yang bergiat di dalam aktiviti yang berbeza di lokasi yang sama mewujudkan pertubuhan yang berbeza.

Walau bagaimanapun dari segi pelaksanaan, di mana pertubuhan hanya mempunyai satu akaun yang disatukan dan sukar untuk diasingkan mengikuti unit atau cawangan, entiti berkenaan dianggap sebagai satu pertubuhan dan dibenarkan menghantar satu borang soal-selidik yang menggabungkan semua unit atau cawangan.

Nilai Output Kasar

Nilai output kasar adalah ditakrifkan dengan memasukkan unsur-unsur berikut :

TERMS USED IN THE TABLES

Below are the definitions of some of the terms used in this section of the report.

The Reporting Unit – The Establishment

The census / survey was conducted on an establishment basis. An establishment was defined as 'an economic unit that engaged in one activity, under a single legal entity and operation in a single legal entity and operating in a single physical location'. Each establishment is assigned an industry classification based on its principal activity and not that of its parent company. An establishment operating in more than one location was required to file a separate report for each store, factory or shop. Thus, conceptually, for a multi-activity entity, units engaged in separate activities in the same location constituted distinct establishments. Similarly, each branch of a multi-branch entity at a different location was conceptually a different establishment.

However, if in practice, the accounts were centrally kept such that it was not possible to obtain separate data for each individual unit or branch, that entity was treated as a single reporting unit and allowed to submit a consolidated return covering all the units or branches.

Value of Gross Output

The value of gross output is defined to include the following elements :

- Opening stock of goods*
- + Closing stock of goods*
- + Services tax received*
- + Services charges received*

Cost of Input

The cost of input is valued at market price and is defined to include the following elements :

Value of materials and supplies consumed (including transport charges incurred and taxes and duties paid)

PERDAGANGAN LUAR NEGERI

External Trade

7. PERDAGANGAN LUAR NEGERI

PENGENALAN

Jadual-jadual Perdagangan Luar Negeri Malaysia mengandungi ringkasan maklumat eksport (termasuk eksport semula) dan import mengikut seksyen dan bahagian barangan, negara / kumpulan negara dan barangan utama dan terpilih termasuk taburan peratus untuk beberapa barangan eksport utama dan barangan import terpilih mengikut negara-negara utama.

OBJEKTIF

Objektif utama penyusunan perangkaan perdagangan luar Malaysia ialah untuk membekalkan maklumat tentang prestasi perdagangan Malaysia berbanding dengan negara-negara lain di dunia dari segi kuantiti, nilai dan nilai unit purata barangan. Justeru itu, perangkaan perdagangan menjadi alat bagi membantu kerajaan dalam menggubal dasar dan memantau prestasi ekonomi serta juga untuk perancangan pembangunan negara. Maklumat tersebut boleh juga digunakan oleh pihak swasta serta orang perseorangan bagi tujuan tertentu seperti membuat unjuran dan analisis ekonomi.

KONSEP

1. Bidang dan Liputan

- 1.1 Malaysia menggunakan 'sistem umum' dalam menyusun perangkaan perdagangan luar negerinya. Di bawah sistem ini, sempadan negara digunakan sebagai sempadan perangkaan. Semua barang yang dibawa masuk atau keluar dari negara (selain pengecualian yang disebutkan di para 9 di bawah) direkodkan, sama ada barangan itu tertakluk kepada kelulusan tertentu ataupun tidak. Barangan yang dibawa masuk atau keluar dari gudang-gudang simpanan kastam, Zon Perdagangan Bebas dan Zon Bebas direkodkan dalam perangkaan ini.
- 1.2 Butir-butir tentang kapal dan kapal terbang dagangan dan persendirian turut **diambil kira** jikalau ianya diimport atau dieksport sebagai barang yang dibeli, dijual atau disewa (*financial*) tidak kira sama ada ianya tiba atau berlepas dengan kuasanya sendiri.

2. Sumber Data

- 2.1 Pengikraran import dan eksport (*hard / soft copy*) yang diluluskan oleh Jabatan Kastam Diraja Malaysia dan Lembaga-Lembaga Zon Bebas.
- 2.2 Keterangan mengenai pengiriman bungkusan pos / *courier* dibekalkan oleh Jabatan Kastam Diraja Malaysia, Pos Malaysia Berhad dan Keretapi Tanah Melayu Berhad (KTMB).

- 2.3 Penyata dan pengiklanan eksport mengenai *bunkers* dan *stores* yang dibekalkan kepada kapal laut dan kapal terbang yang dikeluarkan / diluluskan oleh Jabatan Kastam Diraja Malaysia, Sistem Penerbangan Malaysia Berhad (MAS) dan syarikat-syarikat petroleum.
- 2.4 Penyata penjualan barangan dibekalkan oleh pengusaha-pengusaha Kedai Bebas Cukai.
- 2.5 Penyata jualan elektrik yang dikeluarkan oleh Tenaga Nasional Berhad (TNB).

3. Konsep dan Definisi

- 3.1 Berkuatkuasa dari bulan rujukan **Januari 2000**, konsep dan definisi yang digunapakai untuk menyusun perangkaan ini berdasarkan *International Merchandise Trade Statistics: Concepts and Definitions (IMTS, Rev. 2), 1998* yang dikeluarkan oleh Bangsa-Bangsa Bersatu.

3.2 Import

Sesuatu barang dianggap sebagai import apabila ianya dibawa **masuk** ke dalam negara, sama ada terus ataupun disimpan di gudang-gudang yang dikawal tanpa mengira sama ada barang tersebut adalah untuk kegunaan sendiri, diproses, digunakan dalam perkilangan ataupun untuk dieksport semula ke negara lain. Ia juga diistilahkan sebagai 'import umum'.

3.3 Eksport

Sesuatu barang (keluaran atau buatan tempatan atau diimport untuk dieksport semula) dianggap sebagai eksport apabila ianya dibawa **keluar** dari negara. Ia juga diistilahkan sebagai 'eksport umum'.

3.4 Eksport Semula

Sesuatu barang dianggap sebagai eksport semula apabila ianya dibawa **keluar** dari negara dalam keadaan seperti mana ianya **diimport** tanpa mengalami sebarang **perubahan rupa**. Proses membungkus semula, menyisih atau menggred tidak dikira sebagai satu proses perubahan rupa.

3.5 Imbangan Perdagangan

Imbangan perdagangan ialah perbezaan antara nilai eksport dan import. Apabila eksport melebihi import, **lebih** direkodkan manakala **defisit** pula dicatatkan apabila import melebihi eksport.

4. Asas Penilaian

- 4.1 **Perjanjian WTO ke atas Penilaian** digunakan sebagai asas penilaian untuk semua transaksi barangan.

- 4.2 Nilai ditunjukkan dalam **juta** Ringgit Malaysia (RM).
- 4.3 **Import** dinilai mengikut **c.i.f. (*cost, insurance and freight* - kos, insurans dan tambang)**, iaitu nilai barangan di pasaran di sempadan perangkaan / kastam negara pengimport, termasuk semua perbelanjaan insurans dan tambang semasa dalam perjalanan **tetapi** kos pemunggaran dari alat pengangkutan tidak diambil kira **kecuali** kos tersebut ditanggung sendiri oleh pengangkut.
- 4.4 **Eksport** dinilai mengikut **f.o.b. (*free on board*)**, iaitu nilai barangan di pasaran di sempadan perangkaan / kastam negara pengeksporn, termasuk semua perbelanjaan pengangkutan ke sempadan tersebut, duti eksport dan duti lain yang kena bayar serta kos untuk memunggah barang ke atas alat pengangkutan **kecuali** kos terakhir itu ditanggung sendiri oleh pengangkut.

5. Penjenisan Barang Dagangan

Barang dagangan dalam penerbitan ini dikelaskan mengikut Piawai Klasifikasi Perdagangan Antarabangsa, Pindaan Ketiga [*Standard International Trade Classification, Revision 3 (S.I.T.C. Rev. 3)*] daripada Bangsa-Bangsa Bersatu.

6. Kuantiti

Kuantiti, bila mana ditunjukkan, merupakan berat bersih, isipadu atau ukuran lain bagi barangan itu, tidak termasuk alat pembungkusan. Jika satu-satu barangan itu terdiri daripada pelbagai jenis yang mana satu unit ukuran am tidak boleh digunakan, maka hanya nilai sahaja ditunjukkan.

7. Negara Asal Dan Yang Ditujui

- 7.1 **Import** adalah diklaskan mengikut negara asal barangan, iaitu negara di mana barangan itu dibentuk dengan lengkap seperti mana ianya diimport masuk ke dalam negara. Bagi barangan melalui Singapura, jika maklumat negara asalnya tidak dapat ditentukan, maka import berkenaan dimasukkan di bawah nilai import dari Singapura, iaitu, di bawah kategori yang sama seperti barangan yang dibuat di Singapura.
- 7.2 **Import barangan terpakai** adalah dianggap berasal dari negara yang menghantarnya jikalau negara asalnya tidak dapat ditentukan.
- 7.3 **Eksport** adalah diklaskan mengikut negara yang ditujui, iaitu negara di mana barangan itu dijangka akan digunakan; berdasarkan sejauh mana maklumat ini dapat ditentukan pada masa ianya dieksport. Bagi barangan yang dihantar dengan *optional bill of lading*, negara di mana pelabuhan pertama diketahui akan dikira sebagai negara yang ditujui. Bagi barangan yang dieksport melalui Singapura, jika maklumat mengenai negara yang ditujuinya tidak dapat ditentukan, maka eksport berkenaan adalah dimasukkan di bawah nilai eksport ke Singapura, iaitu, di bawah kategori yang sama seperti barangan yang digunakan di Singapura.

7.4 Bagi *bunkers* dan *stores* yang dibekalkan kepada kapal laut dan kapal terbang, negara yang ditujui ditentukan mengikut negara di mana operator kapal atau kapal terbang tersebut menetap.

8. Transaksi Bernilai Rendah (TBR)

Dalam tahun 1991, semua transaksi tunggal bernilai 'RM500 dan ke bawah', kecuali transaksi yang melibatkan komoditi terpilih, tidak lagi diproses secara terperinci. Pada tahun 1993, pemrosesan *cut-off* telah dinaikkan daripada nilai 'RM500 & ke bawah' kepada nilai 'bawah RM2,000'. 7. EXTERNAL TRADE

INTRODUCTION

The tables on Malaysia's External Trade Statistics contain summary information on exports (including re-exports) and imports by totals, commodity sections and divisions, countries / country groupings and major and selected commodities as well as percentage distribution of some major export commodities and selected imports by major countries.

OBJECTIVE

The main objective of compiling Malaysia's external trade statistics is to provide information on Malaysia's trade performance vis-à-vis the rest of the world in terms of volume, value and average unit value of merchandise goods. The trade statistics, therefore, serve as a tool in assisting the government in formulating policies and monitoring economic performance as well as for development planning. The data can also be used by the private sector and individuals for specific purposes such as for economic projection and analysis.

CONCEPTS

1. **Scope and Coverage**

- 1.1 *The general system of recording is adopted in compiling Malaysian external trade statistics. Under this system, the national boundary of the country is used as the statistical frontier. All goods entering or leaving the country (except specific exclusions mentioned in paragraph 9 below) are recorded, whether or not such goods are subject to clearance. Accordingly, goods entering or leaving customs bonded warehouses, Free Trade Zones and Free Zones are recorded in the statistics.*
- 1.2 *Details of commercial and private ships and aircraft are also **included** in these statistics if they were imported or exported as goods purchased, sold or leased (financial) whether or not they arrived or departed under their own power.*

2. **Source of Data**

- 2.1 *Import and export declarations (hard / soft copy) approved by the Malaysian Royal Customs Department and Free Zone Authorities.*
- 2.2 *Particulars on postal packages are provided by the Malaysian Royal Customs Department, Pos Malaysia Berhad and Keretapi Tanah Melayu Berhad (KTMB).*
- 2.3 *Statements and export declarations on bunkers and stores supplied to ships and aircraft issued / approved by the Malaysian Royal Customs Department, Malaysian Airline System Berhad (MAS) and petroleum companies.*
- 2.4 *Statements on goods sold are supplied by the operators of Duty Free Shops.*
- 2.5 *Statements on the sale of electricity issued by 'Tenaga Nasional Berhad (TNB)'.*

3. *Concepts and Definitions*

3.1 *With effect from reference month **January 2000**, concepts and definitions used for the purpose of compiling these statistics are based on the **United Nations' International Merchandise Trade Statistics: Concepts and Definitions (IMTS, Rev. 2), 1998.***

3.2 *Imports*

*Goods are regarded as imports when they are brought **into** the country either directly or into bonded warehouses, irrespective of whether such goods are for consumption, to be processed, use in manufacturing or subsequent re-exports to other countries. It is also termed as 'general imports'.*

3.3 *Exports*

*Goods (locally produced or manufactured or imported for subsequent re-exports) are regarded as exports when they are taken **out** of the country. It is also termed as 'general exports'.*

3.4 *Re-exports*

*Goods are regarded as re-exports when they are taken **out** of the country in the same form as they were **imported** without any **transformation**. Re-packing, sorting or grading processes are not considered as part of the transformation process.*

3.5 *Balance of Trade*

*The balance of trade is the difference between the value of exports and imports. When exports exceed imports it is recorded as a **surplus** while a **deficit** is registered when imports exceed exports.*

4. *Basis of Valuation*

4.1 *The **WTO Agreement on Valuation** is used as the basis of valuation for all transactions of goods.*

4.2 *Values are shown in **million** Malaysian Ringgit (RM).*

4.3 ***Imports** are valued on a **c.i.f. (cost, insurance and freight)** basis, that is, the value of the goods in the market at the statistical / customs frontier of the importing country, including all charges for transport and insurance whilst in transit **but** excluding the cost of unloading from the carrier **unless** it is borne by the carrier.*

4.4 ***Exports** are valued on a **f.o.b. (free on board)** basis, that is, the value of the goods in the market at the statistical / customs frontier of the exporting country, including all costs of transporting the goods to the statistical / customs frontier, export and other duties payable as well as the cost of loading the goods onto the carrier **unless** the latter cost is borne by the carrier.*

5. **Classification of Commodities**

Commodities in this publication are classified according to the Standard International Trade Classification, Revision 3 (S.I.T.C. Rev. 3) of the United Nations.

6. **Quantities**

Quantities, where shown, represent the net weight, volume or other measurement of the goods exclusive of packing containers. Where a commodity item comprises different kinds of commodities for which a common unit of measurement cannot be used, only values are shown.

7. **Country of Origin and Destination**

7.1 **Imports** are classified according to the country of origin of the goods, that is, the country where the goods are given the final form in which they are imported into the country. For goods imported via Singapore, if information regarding the country of origin cannot be ascertained, such imports are included under the value of imports from Singapore, that is, under the same category as goods produced / manufactured in Singapore.

7.2 **Imports of second-hand goods** are treated as originating from the country of consignment where the country of origin is not ascertainable.

7.3 **Exports** are classified according to the country of destination, that is, the country where it is expected that the goods will be consumed insofar as this can be ascertained at the time of export. In the case of goods shipped on an optional bill of lading, the country of the first port declared is taken as the country of destination. For goods exported via Singapore, if information regarding the country of destination of goods is not known / available, such exports are included under the value of exports to Singapore, that is, under the same category as goods consumed in Singapore.

7.4 **For bunkers and stores supplied to ships and aircraft**, the country of destination is determined according to the country of residence of the operator of the ship or aircraft.

8. **Low Value Transactions (LVT)**

In 1991, with the exception of transactions involving selected commodities, single transactions with a value of 'RM500 and below' are no longer processed at the detailed level. In 1993, the processing cut-off have been extended from values 'RM500 and below' to values 'below RM2,000'. In 1995, the LVT for Malaysia and Peninsular Malaysia have been further extended from values 'below RM2,000' to values 'below RM5,000'. For Sabah and Sarawak, the LVT remains at 'below RM2,000'.

9. Exclusions

Examples are the movement of goods from Thailand bound for Singapore through Peninsular Malaysia and the movement of goods within Malaysia from one free trade zone to another. All goods in transit covered through bills of lading / air-way bills are also included in this category;*
- 9.2 *transshipment cargo, that is, goods transferred under the control of the relevant authorities from the importing means of transport to the exporting means of transport **within** the area of control of the same authorities, which is the office of **both** importation and exportation. For example, goods from Myanmar brought into the Pulau Pinang customs area for the sole purpose of transport to a third country (e.g. to Hong Kong). 8. HARGA-HARGA

PENGENALAN

Seksyen ini mengandungi lapan jadual. Tiga jadual yang pertama (8.1 - 8.3) menunjukkan Indeks Harga Pengguna bagi Malaysia, Semenanjung Malaysia, Sabah dan Sarawak (2005=100) untuk kumpulan utama, subkumpulan Makanan dan Minuman Bukan Alkohol dan empat kategori barangan mengikut ketahanan dan perkhidmatan. Lima jadual yang baki (8.4 - 8.8) menunjukkan Harga Purata Getah, Harga Purata Timah yang berasaskan New York Spot dan Timah KLTM, Harga Purata bagi Barang-barang Terpilih (Minyak Isi Rong Sawit, Isi Rong Sawit dan Minyak Sawit), Harga (Jangkamasa) Minyak Mentah Malaysia dan Indeks Harga Pengeluar Malaysia.

KONSEP

Indeks Harga Pengguna (Jadual 8.1 - 8.3)

Indeks Harga Pengguna Malaysia yang berasaskan formula Laspeyres, mengukur kadar perubahan purata bagi harga sekumpulan barangan dan perkhidmatan yang ditetapkan, yang mewakili corak perbelanjaan kesemua isi rumah di Malaysia, dengan menggunakan tahun 2005 sebagai tahun asas. Item-item ini dikelaskan kepada 12 kumpulan utama berpandukan kepada United Nations "Classification of Individual Consumption According to Purpose (COICOP)".

Indeks Malaysia adalah suatu indeks komposit berdasarkan wajaran perbelanjaan kawasan, dikira dari tiga indeks kawasan iaitu Semenanjung Malaysia, Sabah dan Sarawak, yang dikumpul secara berasingan. Indeks kawasan dikira berdasarkan gabungan indeks Bandar dan luar Bandar menggunakan wajaran komposit masing-masing.

Wajaran perbelanjaan untuk Semenanjung Malaysia, Sabah dan Sarawak adalah diperoleh dari Penyiasatan Perbelanjaan Isi Rumah yang dijalankan bagi dua belas bulan rujukan dari Jun 2004 hingga Mei 2005 dan kemudiannya disesuaikan kepada tahun asas. Untuk mendapatkan wajaran perbelanjaan di peringkat Malaysia, nilai perbelanjaan isi rumah min bagi Semenanjung Malaysia, Sabah dan Sarawak yang diperoleh dari penyiasatan tersebut telah dibesarkan untuk mencerminkan nilai perbelanjaan isi rumah keseluruhannya dalam setiap tiga kawasan yang berkenaan.

Harga bagi lebih kurang 460 barangan telah digunakan dalam pengiraan indeks dan harga-harga tersebut diperoleh dari lebih kurang 20,000 saluran runcit di 98 pusat pungutan di Semenanjung Malaysia, 2,200 saluran runcit di 19 pusat pungutan di Sabah dan 2,400 saluran runcit di 18 pusat pungutan di Sarawak.

Barang tahan lama mempunyai jangkamasa ketahanan lebih dari setahun dan tinggi nilainya, seperti motokar, peti sejuk dan mesin basuh.

Barang semi tahan lama mempunyai jangkamasa ketahanan setahun atau lebih sedikit dan secara relatifnya tidak mempunyai nilai yang besar seperti pakaian, linen, mentol dan perkakas perkebunan.

Barang tidak tahan lama mempunyai jangkamasa ketahanan kurang dari setahun dan harganya tidak tinggi seperti roti, beras, daging, ikan, sayur, air minuman, petrol dan sebagainya.

Perbelanjaan Perkhidmatan meliputi seperti sewa rumah, dobi, khidmat domestik, jahit-menjahit, khidmat perubatan, pengangkutan yang dibeli, perhubungan, bayaran masuk pawagam, perbelanjaan di restoran, kafe, hotel dan sebagainya.

Harga Purata Getah (Jadual 8.4)

Harga purata Getah Mutu Malaysia (G.M.M.) mengikut gred terpilih dalam Jadual 8.4 dikira dengan mencampurkan harga purata harian (sebut harga pada waktu tengah hari – “F.O.B.”) dalam bulan rujukan dan membahagikannya dengan bilangan hari berniaga dalam bulan tersebut. Data harga diperolehi daripada Lembaga Getah Malaysia (LGM).

Harga Purata Timah (Jadual 8.5)

Harga purata Timah 'Standard Grade' (New York Spot) dan Timah PTKL adalah dipetik dari harga harian yang didapati dari Dewan Perlombongan Malaysia.

Harga Timah 'Standard Grade' (New York Spot) dicatat dalam dolar AS setan metrik manakala Timah PTKL adalah dalam Ringgit Malaysia sekilogram. Walau bagaimanapun, mulai 1 Februari 2001, harga di PTKL disebut dalam dolar AS setan metrik.

Harga Purata Bagi Barang-Barang Terpilih (Jadual 8.6)

Harga Purata Minyak Isi Rong Sawit Mentah, Isi Rong Sawit dan Minyak Sawit Mentah dipetik dari harga bulanan yang dikeluarkan oleh Lembaga Minyak Sawit Malaysia.

Harga purata minyak isi rong sawit disebut dalam Ringgit Malaysia setan metrik atas dasar penghantaran tempatan manakala harga isi rong sawit disebut dalam Ringgit Malaysia setan metrik atas dasar harga di kilang (ex-mill) dan harga minyak sawit mentah disebut dalam Ringgit Malaysia setan metrik atas dasar penghantaran tempatan.

Harga (Jangkamasa) Minyak Mentah Malaysia (Jadual 8.7)

Harga jangkamasa bagi kelima-lima gred minyak mentah Malaysia itu adalah seperti pada akhir tahun dan ianya dikeluarkan oleh Petroliaam Nasional Berhad (PETRONAS). Harga disebutkan mengikut dolar AS setong atas dasar f.o.b.

Indeks Harga Pengeluar (Jadual 8.8)

Indeks Harga Pengeluar (IHPR) adalah bertujuan untuk mengukur kadar perubahan purata di dalam semua harga barangan yang dikenakan oleh pengeluar-pengeluar dan dibayar oleh pengimport-pengimport di Malaysia. Indeks ini berasaskan formula Laspeyres.

IHPR meliputi barangan berasal dari lima sektor ekonomi iaitu :-

- A. Pertanian
- B. Perikanan
- C. Perlombongan
- D. Pembuatan
- E. Bekalan Elektrik, Gas dan Air

Penyiasatan Harga Pengeluar meliputi hampir 2185 pertumbuhan dan memungut lebih kurang 3,865 sebutharga bagi hampir 2,056 komoditi.

Komoditi-komoditi tersebut adalah diklasifikasikan mengikut Standard Industrial Trade Classification Rev 3 (S.I.T.C) atau Piawai Penjenisan Perdagangan Antarabangsa (Semakan ke 3). S.I.T.C. pada hakikatnya adalah satu klasifikasi barangan yang berdasarkan kepentingannya dalam syarikat.

Wajaran diperolehi daripada Banci Ekonomi 2000, Akaun Negara Muktamad 2000 dan sumber data alternatif bagi nilai pengeluaran tempatan dan import. Bagi item keluaran tempatan, pengiraan wajaran dibuat berdasarkan nilai pengeluar yang dibekalkan oleh Bahagian Perangkaan Akaun Negara jabatan ini. Bagi import, selain daripada Akaun Negara Muktamad 2000, wajaran diperolehi daripada nilai transaksi perdagangan seperti yang diberi dalam Jadual Perdagangan Akaun Negara 2000.

Nilai-nilai pengeluar tahun 1989 di atas, ditukar-ganti kepada nilai-nilai pengeluar 2000 yang diambil sebagai wajaran tahun asas. Ini bersesuaian dengan tambahan bilangan liputan komoditi mulai tahun 2000 yang menggunakan rangka kerja S.I.T.C. (Semakan ke 3). Seterusnya kedua-dua set wajaran ini dirangkumkan untuk tujuan mengira IHPR umum bagi Ekonomi Tempatan.

8. PRICES

INTRODUCTION

This section consists of eight tables. The first three tables (8.1 - 8.3) highlight the Consumer Price Indices for Malaysia, Peninsular Malaysia, Sabah and Sarawak (2005=100) for the main groups, sub-groups of Food and non-alcoholic beverages and the four categories of items classified by durability and services. The remaining five tables (8.4 - 8.8) show the Average Price of Rubber, the Average Tin Prices based on New York Spot and KLTM Tin, the Average Prices of Selected Commodities (Palm Kernel Oil, Palm Kernel and Palm Oil), the Malaysian Crude Oil (Term) Prices and Producer Price Indices for Malaysia.

CONCEPTS

The Consumer Price Index (Tables 8.1 - 8.3)

The Consumer Price Index Malaysia, which is based on the Laspeyres formula, measures the average rate of change in prices of a fixed basket of goods and services that represents the expenditure pattern of all households in Malaysia with 2005 as the base year. The items are classified according to United Nations "Classification of Individual Consumption According to Purpose (COICOP)" with twelve main groups.

It is a composite index, weighted by regional expenditure weights, of three regional indices computed separately for Peninsular Malaysia, Sabah and Sarawak. The regional indices are computed based on the urban and rural regional indices using respective regional composite weights.

The expenditure weights for Peninsular Malaysia, Sabah and Sarawak were derived from the Household Expenditure Survey conducted for twelve reference months from June 2004 to May 2005 were subsequently adjusted to the base year. To obtain Malaysia level expenditure weights, the mean household expenditure values for Peninsular Malaysia, Sabah and Sarawak derived from the survey for the three regions were blown up to reflect the expenditure values for all households in each of the three regions.

Prices of about 460 items are used in the computation and these are obtained from about 20,000 retail outlets in 98 collection centres in Peninsular Malaysia, 2,200 outlets in 19 collection centres in Sabah and 2,400 outlets in 18 collection centres in Sarawak.

Durable goods have an expected life-time of considerably more than one year and a relatively high value such as motor cars, refrigerators and washing machines.

Semi-durable goods have an expected life-time of use of one year or somewhat more and are not of relatively great value such as clothing, linens, electric bulbs and garden tools.

Non-durable goods have an expected life-time of less than one year and their prices are not high such as breads, rice, meat, fish, vegetables, drinking water, petrol etc.

Services are expenditure such as house rent, laundering, domestic services, tailoring, medical services, purchased transport, communication, entrance fees to cinemas, expenditure in restaurants, cafes, hotels etc.

Average Prices of Rubber (Table 8.4)

The average prices of Standard Malaysian Rubber (S.M.R.) by selected grade in Table 8.4 are derived by adding the daily trading price (Noon Quotations F.O.B.) during the reference month and dividing the total by the number of trading days in that month. The data are obtained from the Malaysian Rubber Board (MRB).

Average Tin Prices (Table 8.5)

The average prices of Standard Grade Tin (New York Spot) and KLTM Tin are derived from the daily prices which are obtained from the Malaysian Chamber of Mines.

The price of Standard Grade Tin (New York Spot) is quoted in US dollar per tonne while that of KLTM tin is in Ringgit Malaysia per kilogram. However, as from 1st February 2001, KLTM price is quoted in US dollar per tonne.

Average Prices of Selected Commodities (Table 8.6)

The average prices of Crude Palm Kernel Oil, Palm Kernel and Crude Palm Oil are derived from the monthly prices which are furnished by the Malaysian Palm Oil Board.

The average price of palm kernel oil is quoted in Ringgit Malaysia per tonne and is on local delivered basis while the price of palm kernel is quoted in Ringgit Malaysia per tonne and is on ex-mill basis, and the price of crude palm oil is quoted in Ringgit Malaysia per tonne and is on local delivered basis.

Malaysia Crude Oil (Term) Prices (Table 8.7)

The term prices of the five grades of Malaysian crude oil are the prevailing prices as at the end of the year and are furnished by Petroliam Nasional Berhad (PETRONAS). The term prices are quoted in U.S. dollar per barrel and is on f.o.b. basis.

Producer Price Index (Table 8.8)

The Producer Price Index (PPI) is designed to measure the average rate of change in prices charged by domestic producers of commodities and those paid by importers in Malaysia. The index is based on the Laspeyres formula.

The PPI takes into account commodities originating from five economy sectors namely:-

- A. Agriculture
- B. Fishing
- C. Mining
- D. Manufacturing
- E. Electricity, Gas and Water Supply

Currently the Producer Price Survey covers about 2185 establishments and collects some 3,865 price quotations for 2056 commodities.

The commodities are classified according to Standard International Trade Classification (Rev 3) (S.I.T.C.) The S.I.T.C.3 is essentially a commodity classification based on the type of material and use of the commodity.

The weights are obtained from the Census of Economy 2000, Final National Accounts 2000 and other alternative sources of data for the value of production and imports. In terms of locally produced items, compilation of the weights is done on the basis of producer values obtained from the National Accounts Statistic Division of the Department. As for import, apart from the Final National Accounts 2000, the weights are taken from the value of trade transactions as given in the National Account Trade Table 2000.

The values were then transformed to 2000 values for use as base year weights in line with the enhanced coverage of commodities in 1989 which uses the S.I.T.C. (Rev 3) framework. Subsequently these two sets of weights were combined for the purpose of computing a general PPI for Domestic Economy.

PERANGKAAN TENAGA BURUH

Labour Force Statistics

9. PERANGKAAAN TENAGA BURUH

PENGENALAN

Seksyen ini membekalkan data hasil daripada Penyiasatan Tenaga Buruh yang mana objektif utamanya adalah untuk mengumpul maklumat berkaitan struktur dan taburan tenaga buruh, guna tenaga dan pengangguran.

KONSEP

Tenaga buruh

Tenaga buruh merujuk kepada mereka yang berumur 15 hingga 64 tahun (dalam tahun genap pada hari jadi terakhir) pada minggu rujukan dan yang sama ada bekerja atau menganggur.

Kadar penyertaan tenaga buruh

Aktiviti ekonomi penduduk pada keseluruhannya bergantung kepada ciri-ciri demografi sesuatu populasi. Dengan itu peratusan mereka yang aktif secara ekonomi berbeza di antara kumpulan-kumpulan kecil penduduk tersebut. Perbezaan ini diukur dengan kadar aktiviti tertentu yang dikenali sebagai **kadar penyertaan tenaga buruh**.

Kadar penyertaan tenaga buruh K_L , dikira mengikut formula berikut :

$$K_L = \frac{P_L}{P_w} \times 100$$

di mana P_L ialah bilangan orang dalam tenaga buruh mengikut sesuatu kategori yang tertentu.

P_w ialah jumlah orang dalam umur bekerja dalam kategori yang sama.

Bekerja

Semua orang yang bekerja sekurang-kurangnya sejam semasa minggu rujukan untuk mendapatkan upah, keuntungan atau keuntungan keluarga (sebagai majikan, pekerja, pekerja sendiri atau pekerja keluarga tanpa gaji).

Juga dianggap sebagai bekerja ialah orang-orang yang tidak bekerja semasa minggu rujukan disebabkan sakit, kecederaan, tiada upaya, cuaca buruk, bercuti, pertelingkahan buruh dan sebab-sebab sosial atau keagamaan tetapi mempunyai pekerjaan, ladang, perusahaan atau perusahaan keluarga lain untuk kembali bekerja. Termasuk juga ialah mereka yang tidak bekerja buat sementara waktu tetapi bergaji dan pasti akan dipanggil bekerja semula.

Mereka yang sedang bekerja dan bekerja kurang dari 30 jam semasa minggu rujukan disebabkan bentuk kerja mereka atau disebabkan kurang kerja dan berkeupayaan dan sanggup menerima beban kerja tambahan dianggap sebagai **guna tenaga tidak penuh**.

Menganggur

Kategori ini termasuk mereka yang menganggur secara aktif dan tidak aktif. Penganggur aktif termasuk mereka yang tidak bekerja semasa minggu rujukan tetapi bersedia untuk bekerja dan aktif mencari pekerjaan dalam minggu tersebut. Penganggur tidak aktif termasuk orang dalam kategori berikut :

- (a) Mereka yang tidak mencari pekerjaan dalam minggu rujukan kerana mereka percaya tidak terdapat pekerjaan ataupun mereka tidak berkelayakan,
- (b) Mereka yang mungkin mencari pekerjaan jika tidak kerana sakit atau cuaca buruk,
- (c) Mereka yang menunggu jawapan kepada permohonan pekerjaan, dan
- (d) Mereka yang telah mencari pekerjaan sebelum minggu rujukan.

Industri

Industri dikelaskan mengikut "**Piawaian Klasifikasi Industri Malaysia (MSIC) 2000**", yang diterbitkan oleh Jabatan Perangkaan Malaysia, berasaskan kepada "**International Standard Industrial Classification of All Economic Activities (ISIC – 88), Revision 3**". Pengelasan industri seseorang merujuk kepada yang berkaitan dengan pekerjaan utamanya.

Pekerjaan

Pekerjaan dikelaskan mengikut klasifikasi "**Piawaian Pengelasan Pekerjaan Malaysia (MASCO) 1998**" berasaskan "**International Standard Classification of Occupations (ISCO – 88)**". Bagi seseorang yang mempunyai lebih daripada satu pekerjaan, hanya pekerjaan yang mengambil masa terbanyak semasa tempoh rujukan dianggap sebagai pekerjaan utamanya. Jika masa bekerja bagi tiap-tiap pekerjaan itu sama, maka pekerjaan yang menghasilkan pendapatan yang tertinggi adalah pekerjaan utamanya. Dalam kes di mana bilangan jam bekerja dan pendapatannya adalah sama bagi setiap pekerjaan, pekerjaan dalam mana dia telah bekerja paling lama dianggap sebagai pekerjaan utamanya.

Perkhidmatan Pekerjaan Awam

Perkhidmatan ini diberikan oleh Bahagian Perkhidmatan Pekerjaan, Jabatan Tenaga Kerja, Kementerian Sumber Manusia. Ianya bertindak sebagai "*clearing house*" dalam pasaran tenaga buruh iaitu penempatan dalam pekerjaan untuk pencari-pencari kerja yang menganggur atau yang mencari kerja yang lebih baik dan juga sebagai punca kepada majikan-majikan. Data yang diberikan di dalam jadual-jadual merujuk kepada mereka yang berdaftar atau kekosongan yang dilaporkan oleh majikan kepada Jabatan Tenaga Kerja.

9. LABOUR FORCE STATISTICS

INTRODUCTION

This section provides data from the Labour Force Survey conducted primarily to collect information on the structure and distribution of the labour force, employment and unemployment.

CONCEPTS

Labour force

Labour force refer to those who, during the reference week, were in the 15 to 64 years age group (in completed years as at last birthday) and who were either employed or unemployed.

Labour force participation rates

*The economic activity of a population is to a large degree dependent on the demographic characteristics of that population. The proportion of economically active persons, therefore, differs between sub-groups of that population. These variations are measured by specific activity rates termed **labour force participation rates**.*

The labour force participation rate R_L , is computed by the formula below :

$$R_L = \frac{P_L}{P_W} \times 100$$

Where P_L is the number of persons in the labour force in the specified category.

P_W is the total number of persons in the working age group in the same category.

Employed

All persons who, at any time during the reference week worked at least one hour for pay, profit or family gain (as an employer, employee, own-account worker or unpaid family worker).

Also considered as employed were persons who did not work during the reference week because of illness, injury, disability, bad weather, vacation, labour dispute and social or religious reason but had a job, farm, enterprise or other family enterprise to return to. Also included were those on temporary lay-off with pay who would definitely be called back to work.

*Employed persons at work and who had worked less than 30 hours during the reference week because of the nature of their work or due to insufficient work and were able and willing to accept additional hours of work were considered **underemployed** but were nevertheless included in the "employed" category.*

Unemployed

This includes both actively and inactively unemployed persons. The actively unemployed includes all persons who did not work during the reference week but were available for work and actively looking for work during the reference week. Inactively unemployed persons include the following categories :

- (a) Persons who did not look for work because they believed no work was available or they were not qualified,*
- (b) Persons who would have looked for work if they had not been temporarily ill or had it not been for bad weather,*
- (c) Persons who were waiting for answers to job applications, and*
- (d) Persons who had looked for work prior to the reference week.*

Industry

Industry is classified according to the "Malaysia Standard Industrial Classification, (MSIC) 2000" published by the Department of Statistics, Malaysia based on the "International Standard Industrial Classification of All Economic Activities (ISIC – 88), Revision 3". A person's industry classification refers to that of his principal occupation.

Occupation

Occupation is classified according to the "Malaysia Standard Classification of Occupations (MASCO) 1998" based on the "International Standard Classification of Occupations (ISCO – 88)". For a person having more than one job, only the job at which he worked for the longest number of hours during the reference week was treated as his principal occupation. Should the number of hours worked for each job be the same, then the job with the highest income was the principal occupation. When the number of hours worked and the income earned from each job were the same, the job at which he was working for the longest period of time was the principal occupation.

Public Employment Service

This service is provided by the Employment Services Division, Labour Department, Ministry of Human Resources. It acts as a clearing house in the employment market, that is job placements for job seekers who are unemployed or are looking for better positions, and also as a source for recruitment of workers to employers. The data provided in the tables refer to those registered or vacancies reported by employers to the Labour Department.

10. HOUSEHOLD INCOME AND EXPENDITURE

INTRODUCTION

This section presents the findings of two household surveys, that is the Household Income Survey and the Household Expenditure Survey. Data on the mean monthly gross household income is obtained from the Household Income Survey 1999 and 2004. The mean monthly household consumption expenditure data was obtained from the Household Expenditure Survey, which was carried out in 1998/99 and 2004/05.

CONCEPTS

Household

A household is defined as person or persons who have made arrangements, individually or in groups, for providing themselves with food or other essentials within the same living quarters.

However, an additional condition is attached to the Household Expenditure Survey whereby the persons mentioned above are required to stay in the said living quarter for 16 days or more, in the reference period.

Household income

Household income is the sum of household money income and / or household income in kind which are of a recurring nature and accruing to the household or to individual member of the household regularly at annual or at more frequent time intervals.

Main source of income

*Detailed information on income was obtained from household members who were **income recipients**. The **main source of income** collected include:-*

- (i) Earnings from **paid employment** (which include wages and salaries, cash allowances, bonuses, commissions, overtime payments, free food, free or concessional lodging, free or concessional consumer goods, payment in kind and employer's contributions to EPF / SOCSO).*
- (ii) Income from **self-employment** (including the value of home produced goods for own consumption).*
- (iii) **Property income** (which includes royalties, rents, interests and dividends).*
- (iv) **Current transfer receipts** (such as remittances, alimony, scholarships and fellowships, pensions, periodic payments from inheritance or trust funds and gifts in cash or in kind received).*
- (v) **Other income** (imputed rent of owner-occupied house).*

Household consumption expenditure

Household consumption expenditure is the expenditure incurred by private households on consumption goods and / or services.

*The consumption expenditure items were classified into twelve broad groups according to the goods and services which were commonly used in people's daily life. The groups so classified were **food and non-alcoholic beverages; alcoholic beverages and tobacco; clothing and footwear; housing, water, electricity, gas and other fuels; furnishings, household equipment and routine household maintenance; health; transport; communication; recreation services and culture; education; restaurants and hotels; and miscellaneous goods and services.***

AKAUN NEGARA

National Accounts

11. AKAUN NEGARA

PENGENALAN

Seksyen ini mempersembahkan akaun makro-ekonomi dalam bentuk Keluaran Dalam Negeri Kasar (KDNK) dan Pendapatan Negara Kasar (PNK) mengikut kedua-dua nilai, iaitu nilai malar (2000 = 100) dan nilai semasa.

Jadual 11.1 dan 11.2 masing-masing menunjukkan KDNK dan PNK dalam harga semasa dan malar (2000 = 100) yang dikelaskan mengikut jenis perbelanjaan. Jadual 11.3 dan 11.4 mempersembahkan KDNK mengikut aktiviti ekonomi dalam harga semasa dan malar.

KONSEP

Perangkaan Akaun Negara yang pertama telah disusun dan diterbitkan pada separuh akhir tahun 1950'an, dan sejak itu, Jabatan Perangkaan telah menyusun dan menerbitkan perangkaan akaun negara secara tahunan.

Anggaran terkini yang disusun dan diterbitkan oleh Jabatan ini adalah bagi tahun rujukan 2006. Bagi tujuan penerbitan ini, data bagi tahun 2000 hingga 2006 dipersembahkan.

Sistem akaun negara ini adalah berdasarkan konsep dan metodologi yang terdapat dalam penerbitan bertajuk "*System of National Accounts, 1993*", atau ringkasnya SNA (1993), Pejabat Perangkaan Bangsa-Bangsa Bersatu.

Selaras dengan syor-syor SNA (1993), pendekatan aliran komoditi terperinci telah diamalkan oleh Jabatan. Walau bagaimanapun, pengeluaran perangkaan akaun negara yang menggunakan pendekatan yang disyorkan ini, mengambil masa yang panjang kerana ia melibatkan bentuk kerja yang banyak dan kompleks. Oleh itu, pendekatan aliran komoditi ini digunakan hanya untuk pengeluaran perangkaan akaun negara muktamad. Akaun negara muktamad telah disusun dan diterbitkan bagi tahun 1971, 1973, 1978, 1983, 1987, 1991 dan 2000.

Bagi penyiaran perangkaan akaun negara yang bertepatan masa dan untuk tahun-tahun di mana akaun negara muktamad tidak disusun, Jabatan ini menerbitkan anggaran akaun negara tahunan. Anggaran ini adalah berdasarkan kepada penunjuk penawaran dan permintaan yang didapati daripada perangkaan semasa yang dikumpul oleh Jabatan dan data sekunder yang dikumpulkan oleh agensi luar Jabatan.

Keluaran Dalam Negeri Kasar ialah jumlah nilai barang dan perkhidmatan yang dikeluarkan dalam tempoh tertentu selepas menolak harga barang dan perkhidmatan yang digunakan dalam proses pengeluaran tetapi belum ditolak nilai penggunaan modal tetap. KDNK boleh dinilai pada nilai pembeli dan pada harga faktor.

Pendapatan Negara Kasar adalah merujuk kepada pengeluaran oleh penduduk negara, sama ada mereka bermastautin dalam wilayah tempatan atau tidak. KDNK boleh ditukar kepada PNK dengan menambah pendapatan faktor bersih dari luar negara.

Perbelanjaan Penggunaan Akhir Kerajaan meliputi perbelanjaan bagi gaji dan upah, barang dan perkhidmatan dan penggunaan modal tetap dan ditolak nilai jualan.

Perbelanjaan Penggunaan Akhir Persendirian adalah perbelanjaan bagi barang dan perkhidmatan oleh orang perseorangan dan perbelanjaan oleh institusi bukan untung swasta yang memberikan perkhidmatan kepada isi rumah. Butiran ini tidak termasuk pembelian tempat kediaman oleh orang perseorangan, perbelanjaan modal oleh institusi bukan untung swasta dan penyelenggaraan tempat kediaman, tetapi termasuk perbelanjaan persendirian ke atas kenderaan bermotor dan barang tahan lama yang lain serta nilai sewa tertaksir tempat kediaman yang didiami sendiri oleh pemilik. Nilai barang makanan yang dikeluarkan dan digunakan dalam kebun dan pembayaran gaji dan upah dalam bentuk benda adalah termasuk dalam perbelanjaan penggunaan akhir persendirian ini.

Pembentukan Modal Tetap Kasar adalah perbelanjaan ke atas harta tetap oleh industri dan kerajaan serta bayaran pindahan harta tanah. Ini termasuklah perbelanjaan ke atas bangunan kediaman, bangunan bukan kediaman, pembinaan kejuruteraan awam yang lain, pembaikan tanah, alat pengangkutan, jentera dan peralatan serta penternakan binatang untuk baka.

Eksport Barang dan Perkhidmatan adalah nilai barang yang dieksport dan jumlah yang diterima daripada bukan pemastautin bagi perkhidmatan yang disediakan oleh pemastautin Malaysia.

Import Barang dan Perkhidmatan adalah nilai barang yang diimport dan jumlah yang kena dibayar kepada bukan pemastautin bagi perkhidmatan yang disediakan kepada pemastautin Malaysia.

11. NATIONAL ACCOUNTS

INTRODUCTION

This section presents macro-economic accounts in terms of Gross Domestic Product (GDP) and Gross National Income (GNI) in both constant (2000 = 100) and current values.

Tables 11.1 and 11.2 show GDP and GNI respectively in current and constant prices (2000 = 100) classified by type of expenditure. Tables 11.3 and 11.4 present GDP by kind of economic activity in current and constant prices.

CONCEPTS

National Accounts statistics were first compiled and published during the latter half of the 1950's and since then, the Department of Statistics has compiled and published national accounts statistics on an annual basis.

The latest estimates compiled and published by the Department is for reference year 2006. For the purpose of this publication, data for the years 2000 to 2006 are presented.

The system of national accounts is based on the concepts and methodology outlined in the publication entitled "System of National Accounts, 1968", in short referred to as the SNA (1993) of the United Nations Statistical Office.

In line with the recommendations of the SNA (1993), a detailed commodity-flow approach has been adopted by the Department. The production of national accounts statistics using this recommended approach would, however, result in a considerable time-lag due to the voluminous and complex nature of the work involved. As such, this commodity-flow approach is used only for the production of final national accounts statistics. Final national accounts have been compiled and published for the years 1971, 1973, 1978, 1983, 1987, 1991 and 2000.

For more timely releases of national accounts statistics and for the years for which final national accounts are not compiled, the Department publishes annual national accounts estimates. These estimates are based on supply and demand indicators emanating from current statistics collected by the Department and secondary data collected by agencies outside the Department.

Gross Domestic Product is the total value of goods and services produced within a given period after deducting the cost of goods and services used up in the process of production but before deducting allowances for the consumption of fixed capital. Gross domestic product can be valued at purchasers' values and at factor cost.

Gross National Income refers to the production of the nationals of the country, whether they are in residence in the domestic territory or not. Gross domestic product may be converted to Gross National Income by adding net factor incomes from abroad.

Government Final Consumption Expenditure encompasses expenditure on salaries and wages, goods and services and consumption of fixed capital less value of sales.

Private Final Consumption Expenditure is expenditure on goods and services by persons and expenditure by private non-profit institutions serving households. This item excludes purchases of dwellings by persons, capital expenditure by private non-profit institutions and maintenance of dwellings, but includes personal expenditure on motor vehicles and other durable goods and the imputed rent of owner-occupied dwellings. Both the value of food produced and consumed on farms and the payment of salaries and wages in kind is included in private final consumption expenditure.

Gross Fixed Capital Formation consists of the outlays on fixed assets by industries and the Government and real estate transfer fees. Included are expenditure on residential buildings, non-residential buildings, other civil engineering construction, land improvement, transport equipment, machinery and equipment and breeding stock.

Exports of Goods and Services is the value of goods exported and the amounts receivable from non-residents for the provision of services by Malaysian residents.

Imports of Goods and Services, similarly, is the value of goods imported and amounts payable to non-residents for the provision of services to Malaysian residents.

IMBANGAN PEMBAYARAN

Balance of Payments

12. IMBANGAN PEMBAYARAN

PENGENALAN

Maklumat yang ditunjukkan dalam Jadual Imbangan Pembayaran Malaysia merujuk kepada transaksi antarabangsa dalam akaun semasa dan akaun modal & kewangan. Akaun semasa merekodkan transaksi barangan, perkhidmatan, pendapatan dan pindahan semasa manakala akaun modal & kewangan merekodkan perubahan dalam aset dan liabiliti kewangan asing negara ini.

OBJEKTIF

Objektif utama penyusunan anggaran imbangan pembayaran Malaysia adalah untuk menyediakan maklumat tentang prestasi ekonomi Malaysia berbanding dengan negara-negara lain dari segi magnitud dan jenis transaksi dalam Akaun Semasa dan juga di dalam aliran Akaun Modal serta Kewangan. Secara khususnya, kedudukan Akaun Semasa menunjukkan ringkasan tentang transaksi yang berlaku di dalam item / komponen barangan, perkhidmatan, pendapatan dan pindahan semasa negara, dan menggambarkan tentang pendapatan dan perbelanjaan yang dinilai dari segi pertukaran asing keseluruhan Malaysia bagi tempoh di bawah kajian. Anggaran tersebut juga menunjukkan imbangan akaun semasa yang diukur dari segi peruntukan bersih sumber kepada atau daripada negara lain, yang dicerminkan oleh sama ada Malaysia mempunyai tuntutan bersih ke atas atau liabiliti kepada negara lain di dunia.

Anggaran imbangan pembayaran digunakan sebagai alat pengukur di dalam kerja analisa dan penggubalan polisi oleh agensi perancang pusat seperti Bank Negara Malaysia (BNM), Unit Perancang Ekonomi dan Perbendaharaan dan juga oleh penganalisa pasaran, penyelidik dan pengguna lain.

SKOP

Anggaran imbangan pembayaran yang disusun oleh Jabatan adalah pada peringkat Malaysia. Mulai 1999, anggaran ini telah disusun berdasarkan metodologi di dalam Manual Imbangan Pembayaran edisi ke-5 (BPM5) yang diterbitkan oleh Tabung Kewangan Antarabangsa (IMF).

KONSEP

1. Imbangan Pembayaran

- 1.1 Anggaran Imbangan Pembayaran Malaysia merupakan satu laporan perangkaan bagi suatu tempoh yang menunjukkan:
 - 1.1.1 transaksi ekonomi antarabangsa Malaysia tentang barangan, perkhidmatan dan pendapatan yang diterima daripada dan yang diberikan kepada bukan residen (negara lain di dunia);

1.1.2 bayaran pindahan semasa / modal daripada residen Malaysia kepada bukan residen yang merupakan satu bentuk transaksi di mana satu entiti menyediakan sesuatu yang mempunyai nilai ekonomi kepada entiti lain tanpa menerima balasan; dan

1.1.3 perubahan pada tuntutan (aset) kewangan Malaysia terhadap bukan residen dan liabiliti kepada bukan residen.

2. Akaun Semasa

2.1 Akaun ini ialah rekod transaksi antarabangsa bagi barangan, perkhidmatan, pendapatan dan pindahan semasa. Ia mencerminkan pendapatan dan perbelanjaan Malaysia dari segi tukaran asing dalam tempoh tertentu. Lebihan (+) berlaku apabila pendapatan melebihi perbelanjaan. Jika sebaliknya, maka wujudlah defisit (-).

2.1.1 Barangan dan Perkhidmatan

2.1.1.1 Barangan

Barangan meliputi kedua-dua eksport dan import bagi dagangan am, barangan untuk diproses, perkhidmatan penyelenggaraan atas barangan, barangan yang diperoleh oleh pesawat udara di lapangan terbang dan oleh kapal di pelabuhan, dan emas bukan monetari.

(a) Eksport f.o.b. merujuk kepada nilai pasaran barangan di sempadan kastam negara pengeksport, iaitu meliputi semua kos pengangkutan barangan ke sempadan kastam, eksport, duti lain yang kena bayar, dan kos muatan ke kenderaan pengangkut melainkan jika kos ini ditanggung sendiri oleh syarikat pengangkut.

(b) Import c.i.f. merujuk kepada nilai pasaran barangan di sempadan kastam negara pengimport, iaitu meliputi semua caj pengangkutan dan insurans ketika dalam perjalanan tetapi tidak termasuk kos punggahan daripada kapal pesawat udara atau kenderaan, melainkan kos sedemikian ditanggung sendiri oleh syarikat pengangkut tersebut. Nilai c.i.f. ini dibuat penyesuaian kepada nilai f.o.b. untuk digunakan dalam perangkaan imbalan pembayaran.

(c) Imbalan barangan f.o.b. [barangan (bersih)] diperoleh secara barangan-kredit tolak barangan-debit. Ia berbeza daripada imbalan pada perangkaan perdagangan luar negeri berdasarkan kepada alasan berikut:

i. pada perangkaan perdagangan luar negeri, import dinilai pada c.i.f.; dan

- ii. pada imbalan pembayaran, barangan (bersih) membabitkan penyesuaian dari segi liputan dan pertukaran hak milik.

2.1.1.2 Perkhidmatan

Perkara ini meliputi :

(a) Pengangkutan

Pengangkutan meliputi semua perkhidmatan pengangkutan (laut, udara dan lain-lain - termasuk darat, jalan air, angkasa lepas dan talian paip) yang diberikan oleh residen sebuah ekonomi kepada bukan residen ekonomi lain. Ia melibatkan perkhidmatan pengangkutan penumpang, barangan (tambang), pengangkutan sokongan dan tambahan lain.

(b) Perjalanan

Perkara ini merujuk kepada barangan dan perkhidmatan seperti penginapan, makanan, hiburan, pengangkutan domestik, hadiah dan cenderamata yang diperoleh oleh pelawat asing ketika berada di Malaysia, dan yang diperoleh oleh residen Malaysia ketika berada di negara asing. Perbelanjaan berkaitan pendidikan, kesihatan dan keagamaan juga dikira di sini.

(c) Perkhidmatan Lain

- i. Selain daripada komponen 'Pengangkutan' dan 'Perjalanan', perkara ini meliputi semua transaksi perkhidmatan dengan bukan residen yang tidak direkodkan di tempat lain dalam Imbalan Pembayaran. Dalam konteks Malaysia, transaksi yang terbabit ialah perkhidmatan komunikasi (telekomunikasi dan pos), pembinaan, insurans (barangan dan bukan barangan), kewangan, komputer & maklumat, royalti & yuran lesen, perkhidmatan perniagaan lain (seperti dagangan *merchanding*, sewaan operasi dan perkhidmatan profesional & teknikal) dan perkhidmatan persendirian, kebudayaan dan rekreasi dan perkhidmatan kerajaan.
- ii. Perdagangan *merchanding* ditakrifkan sebagai pembelian barangan bukan residen oleh residen, dan tanpa memasuki Malaysia terlebih dahulu, barangan tersebut dijual pula kepada bukan residen lain. Perbezaan di antara harga belian dengan jualan semula dicatatkan sebagai nilai perkhidmatan *merchanding*.

2.1.1.3 Pendapatan

Pendapatan meliputi dua jenis transaksi antara residen dan bukan residen iaitu pampasan pekerja yang diterima oleh residen yang bekerja di luar negeri atau yang dibayar kepada bukan residen yang bekerja di Malaysia dan pendapatan pelaburan. Pampasan pekerja terdiri daripada upah, gaji dan kemudahan lain dalam bentuk tunai atau barangan. Pendapatan Pelaburan pula melibatkan penerimaan dan pembayaran ke atas aset dan liabiliti kewangan asing yang dihasilkan dari pelaburan langsung, pelaburan portfolio dan pelaburan lain.

2.1.1.4 Pindahan Semasa

- (a) Pindahan adalah kemasukan bagi mengimbangi sebarang pemberian yang tiada balasan, untuk sumber sebenar atau sumber kewangan dan ia berbentuk wang tunai atau barangan. Pindahan semasa terbahagi kepada dua sektor utama iaitu sektor awam dan sektor lain.
- (b) Termasuk penerimaan atau pembayaran geran secara tunai atau barangan oleh sektor kerajaan bagi tujuan pembangunan ekonomi dan sosial, cukai, denda dan yuran yang diterima atau dibayar oleh kerajaan.
- (c) Penerimaan atau pembayaran dalam sektor lain termasuk geran dan hadiah secara tunai atau barangan yang diterima daripada atau diberi kepada organisasi yayasan amal dan agama di luar negeri. Termasuk juga kiriman wang yang dibuat oleh ekspatriat dan pekerja asing yang bekerja di Malaysia.

2.2 Imbangan Akaun Semasa

Akaun ini merupakan hasil tambah komponen-komponen berikut:

- (a) imbangan barangan, perkhidmatan dan pendapatan; dan
- (b) pindahan semasa bersih.

3. Akaun Modal dan Kewangan

Akaun ini mempunyai dua komponen utama iaitu Akaun Modal dan Akaun Kewangan. Komponen akaun modal merangkumi pindahan modal dan perolehan / penjualan aset bukan kewangan bukan pengeluaran. Komponen akaun kewangan merangkumi pelaburan langsung, pelaburan portfolio dan pelaburan lain dan juga aset rizab. Lebihan (+) menunjukkan wang aliran masuk lebih tinggi berbanding aliran keluar manakala defisit (-) menunjukkan wang aliran keluar lebih tinggi berbanding aliran masuk.

3.1 Pelaburan langsung

Perkara ini merujuk kepada transaksi aset dan liabiliti kewangan asing ekoran daripada pelaburan langsung asing di luar negeri dan pelaburan langsung asing (FDI) di Malaysia. Perkara ini meliputi modal ekuiti (ekuiti dan sekuriti hutang), modal lain (seperti pinjaman, kredit perdagangan, deposit, dll) serta perolehan tertahan.

3.2 Pelaburan portfolio

Perkara ini merujuk kepada transaksi bersih dalam sekuriti ekuiti dan sekuriti hutang seperti bon, nota dan instrumen pasaran kewangan. Transaksi derivatif kewangan (aset dan liabiliti) juga direkodkan di sini.

3.3 Pelaburan lain

Kategori ini meliputi semua transaksi aset dan liabiliti kewangan yang tidak tergolong di dalam mana-mana kategori pelaburan langsung, pelaburan portfolio dan aset rizab. Komponen ini merangkumi kredit perdagangan, pinjaman (jangka panjang dan pendek), deposit dan aset / liabiliti lain.

3.4 Akaun Modal & Kewangan menjelaskan tentang bagaimana lebihan pada Akaun Semasa digunakan dan defisit dibiayai. 12. BALANCE OF PAYMENTS

INTRODUCTION

The information presented in the table on Malaysia's Balance of Payments relate to international transactions on both the current and capital & financial accounts. The current account record transactions in goods, services, income and current transfers while the capital & financial account records changes in the country's financial assets and liabilities.

OBJECTIVE

The main objective of compiling Malaysia's balance of payments estimates is to provide information on Malaysia's economic performance vis-à-vis the rest of the world in terms of the magnitude and types of transactions in Current Account and also in Capital and Financial Account flows. In particular, the Current Account position summarises the country's transactions in goods, services, income and current transfers, and presents an overall view of Malaysia's earnings and spendings in terms of foreign exchange for the period under review. As the current account balance reflects the net provision of resources to or from the rest of the world, the estimates also indicate whether Malaysia has net claims on or liabilities to the rest of the world.

The balance of payments estimates serve as a tool for economic analysis and policy formulation by the central planning agencies, such as Bank Negara Malaysia (BNM), the Economic Planning Unit and the Treasury as well as market analysts, researchers and other users.

SCOPE

The balance of payments estimates relate to Malaysia as a whole. Commencing from 1999, the estimates were compiled in conformity with the methodology set forth in the 5th edition of the Balance of Payments Manual (BPM5) of the International Monetary Fund (IMF).

CONCEPTS

1. Balance of Payments

- 1.1 *The Balance of Payments estimates for Malaysia is a statistical statement for a given period showing:*
 - 1.1.1 *Malaysia's international economic transactions in goods, services and income received from, and provided to non-residents (the rest of the world);*
 - 1.1.2 *Malaysia's provision of current / capital transfers to non-residents, which refer to transactions in which one transactor provides an economic value to another transactor but does not receive any quid pro quo in return; and*

1.1.3 *The changes in Malaysia's financial claims on, and liabilities to non-residents.*

2. *The Current Account*

2.1 *This account is a record of international transactions in goods, services, income and current transfers. It gives a picture of Malaysia's earnings and spendings in terms of foreign exchange for a given period. A surplus (+) arises if these earnings exceed similar spendings, while a deficit (-) shows up in the reverse case.*

2.1.1 *Goods and Services*

2.1.1.1 *Goods*

Goods cover both the exports and imports of general merchandise, goods for processing, repairs on goods, goods procured in airports and ports by carriers, and non-monetary gold.

(a) Exports f.o.b. refer to the value of the goods in the market at the statistical / customs frontier of the exporting country, including all costs of transporting the goods to the statistical / customs frontier, export and other duties payable as well as the cost of loading the goods onto the carrier unless the latter cost is borne by the carrier.

(b) Imports c.i.f. refer to the value of the goods in the market at the statistical / customs frontier of the importing country, including all charges for transport and insurance whilst in transit but excluding the cost of unloading from the ship, aircraft or vehicle, unless it is borne by the carrier. The c.i.f. value is adjusted to a f.o.b. valuation for balance of payments statistics.

(c) Balance on goods f.o.b. (net goods) is derived by subtracting goods-debit from goods-credit. It is different from the balance as shown in the external trade statistics because of the following reasons:

- i. imports are recorded in c.i.f. in the external trade statistics; and*
- ii. goods (net) in the balance of payments are adjusted for coverage and change of ownership.*

2.1.1.2 Services

Include the following components :

(a) Transportation

Transportation covers all transportation (sea, air and other – including land, internal waterway, space and pipeline) services that are performed by residents of one economy for those of another and that involve the carriage of passengers, the movement of goods (freight) and related supporting and auxiliary services.

(b) Travel

The item refers to the goods and services such as accommodation, meals, entertainment, internal transportation and gifts and souvenirs acquired from Malaysia by visitors during their stay in Malaysia and from abroad by Malaysian residents travelling overseas. Expenditure related to education, health and religion are also taken into account.

(c) Other Services

i. Apart from 'Transportation' and 'Travel' components, this item is defined to include services transactions with non-residents which are not recorded elsewhere in the Balance of Payments. In the Malaysian context, the services transacted are categorised under communication (telecommunication, postal & carrier), construction, insurance (merchandise and non-merchandise), financial, computer & information related, royalties & licence fees, other business services (merchanting trade, operational leasing, misc. professional & technical services), personal, cultural & recreational services and government services.

ii. Merchanting trade is defined as the purchase of goods by a resident from a non-resident and the subsequent resale of the goods to another non-resident. During the process, the goods are not brought into Malaysia. The difference between the purchase and resale values of the goods transacted is recorded as the value of merchanting services provided.

2.1.1.3 Income

Income covers two types of transactions between residents and non-residents namely, those involving compensation of employees which is earned by resident workers working abroad or paid to non-resident workers working in Malaysia. Compensation of employees comprises wages, salaries, and other benefits, in cash or in kind. The other type of income is involving investment income receipts and payments on external financial assets and liabilities namely income derived from direct investment, portfolio investment and other investment.

2.1.1.4 Current Transfers

(a) Transfers are offsetting entries to the provision, without quid pro quo, of real or financial resources, in the form of cash or in kind. Current transfers are classified according to two main categories : general government and other sector.

(b) Receipts or payments in the general government sector include grants in cash or kind for economic and social development, taxes, fines, fees received or paid by government.

(c) Receipts or payments in the general sector include grants and gifts received or given from / to charitable or religious organizations. Remittances by expatriates and foreign workers in Malaysia are also included in this category.

2.2 Balance on Current Account

This account is the sum of the following sub-components:

(a) balance on goods, services and income; and

(b) net current transfers.

3. Capital and Financial Account

This account has two major components – the capital account and the financial account. The components classified under the capital account are capital transfers and acquisition / disposal of non-produced, non-financial assets. Components of the Financial accounts cover mainly direct, portfolio and other investment as well as reserve assets. A surplus (+) indicates that an inflow of fund exceeds that of the outflow while a deficit (-) denotes the outflow of fund is greater than the inflow.

3.1 Direct Investment

Reference is made to the transactions in foreign financial assets and liabilities arising from direct investment abroad and in Malaysia (FDI). Data for direct investment (abroad or in Malaysia) refer to equity capital (equity & debt securities), other capital (loans, trade credits, currency & deposit, etc.) and retained earnings.

3.2 Portfolio Investment

This item reflects net transactions in equity securities and debt securities in the form of bonds & notes and money market instruments. Transactions in financial derivatives (assets and liabilities) are also recorded under this item.

3.3 Other Investment

This category covers all financial transactions in assets and liabilities not recorded under direct investment, portfolio investment and reserve assets. Among the instruments covered under this investment are trade credits, loans (long and short term), currency & deposits and other assets or liabilities.

3.4 The Capital & Financial Account tells how the surplus in the Current Account is utilised or how the deficit is financed. Thus, a surplus may be reflected in investments abroad or overseas lending or accumulation of reserves. Conversely, a deficit in the Current Account may be financed by foreign investment inflows or external borrowings or a draw downs on reserve assets.

4. Errors and Omissions

This arises from the underestimation or overestimation of the values for the individual Balance of Payments items, which are offset by a net entry for this item. Discrepancies also occur because data used in the compilation of the estimates are recorded either on a cash-flow basis, such as data sourced from BNM's International Transactions Information System (ITIS) or on an accrual basis, for example, data generated by the Quarterly Survey of International Investment and Services (PPPA) and could also arise from valuation gains or losses.

5. Overall Balance of Payments

This refers to the overall performance of the Balance of Payments after taking into account the balance on current account, capital and financial account and also Errors & Omissions and Reserve Assets.

6. Reserve Assets

These are foreign financial assets available to, and controlled by, BNM for financing or regulating payments imbalances or for other purposes. This category comprises of :

6.1 *monetary gold; and*

6.2 *Special Drawing Rights (SDR), reserve position in the IMF, foreign exchange assets (such as currency & deposit and securities) and other claims.*

A negative sign (-) denotes an increase while a positive sign (+) denotes a decrease in the reserve assets.

7. Data Sources

Data for compiling the Balance of Payments estimates are sourced as follows:

7.1 *primary sources such as the Quarterly Survey of International Investment and Services, the Survey of Foreign Airline Companies in Malaysia and the Census of Shipping Companies in Malaysia conducted by the Department;*

7.2 *secondary sources such as the tourism statistics compiled by the Malaysia Tourism Promotion Board, using data emanating from its Departing Visitors' Survey supplemented by data from the Immigration Department. Other sources include data on loan drawings and repayments by the federal government and Non Financial Public Enterprises (NFPE) compiled by BNM and BNM's International Transactions Information System (ITIS); and*

7.3 *administrative records of the public and private sectors. In the public sector, information from BNM, the Accountant-General's Office, the Royal Malaysian Custom, the Ministry of Defence, the Ministry of Foreign Affairs, the Port Authorities etc. are used. Companies in the private sector which provide data include the national carriers, Malaysia Airports Berhad and Pos Malaysia Berhad.*

8. Revisions

Revisions made from time to time as a result of continuous quality checks are incorporated in the latest issue.

9. Rounding

Any discrepancies in the data presented are due to rounding errors.

17. HEALTH

INTRODUCTION

This section provides information on the number of medical personnel, hospitals and special medical institutions, and admissions to government hospitals.

CONCEPTS

The data on health have been extracted mainly from administrative records.

Government Hospitals

These include all establishments permanently staffed by at least one physician, and can offer in-patient accommodation and provide active medical and nursing care. Those establishments providing principally custodial care are not included.

Special Medical Institutions

These are hospitals providing medical and nursing care primarily for only one discipline. This category does not include the specialized departments administratively attached to a principal General Hospital and sometimes located in an annex or separate pavilion as their beds would have already been counted in the principal General Hospital.

Beds

These beds cover only those that are regularly maintained for the accommodation and full-time care of a succession of in-patients, and which are situated in wards or areas of the hospital where continuous medical care for in-patient can be provided. The total of such beds constitute the normally available bed complement of the hospital which include cots or bassinets set aside for babies requiring special care (e.g. bassinets in a special care nursery) but exclude beds in labour room, post-anaesthetic or post-operative beds which are not maintained for continued use by patients, observation or recovery beds in out-patient department and cots for normal newborn infants in obstetrics wards.

Dentist

Dentist is divided into two categories; i.e. Division I and Division II. Division I refers to registered dentist with professional qualifications. Division II refers to registered dentist without professional qualification.

PELANCONG ASING

Foreign Tourists

19. PELANCONG ASING

Perangkaan Pelancong Asing telah dikira mengikut bilangan pemergian oleh pelancong luar negeri dari negara ini dalam sesuatu tempoh tertentu.

KONSEP

Sumber asas perangkaan ini ialah kad ketibaan dan pemergian pelawat ke Semenanjung Malaysia, Sabah dan Sarawak. Dengan memadankan kad pelawat secara komputer dan membandingkan tarikh ketibaan dengan tarikh pemergiannya, tempoh kediaman sebenar seseorang pelawat dapat dikira. Ini membolehkan komputer memproses data berkaitan dengan pelancong sahaja iaitu mereka yang menginap di negara ini sekurang-kurangnya satu malam.

Pelawat

Bagi tujuan perangkaan, istilah ini merujuk kepada orang yang melawat sesebuah negara selain dari negara di mana terdapat tempat kediaman biasanya bagi apa-apa sebab selain daripada sebab pekerjaan yang mendapat bayaran dari negara yang dilawati.

Pelancong

Pelawat yang menginap sekurang-kurangnya satu malam dan tujuan perjalanannya termasuk mengisi masa lapang (rekreasi, percutian, kesihatan, pendidikan, agama dan sukan), perniagaan, menziarahi kawan atau saudara dan menghadiri mesyuarat atau persidangan.

Pelawat Sementara

Mereka adalah pelawat sementara yang tidak menginap walaupun satu malam di negara ini.

19. FOREIGN TOURISTS

The statistics on Foreign Tourists were enumerated according to number of departures made by foreign tourists from the country in a given period.

CONCEPTS

The basic source of these statistics is the arrival and departure cards of visitors to Peninsular Malaysia, Sabah and Sarawak. By means of computer matching of visitor cards and comparing date of arrival against the date of departure, the actual length of stay of a visitor is computed. This enables the computer to be programmed to process data relating only to tourists i.e. those visitors making at least an overnight stay in the country.

Visitor

For statistical purposes, this term refers to any person visiting a country other than that in which he has his usual place of residence for any reason other than following an occupation remunerated from within the country visited.

Tourist

Visitor making at least a single overnight stay and the purpose of whose journey include leisure (recreation, holiday, health, study, religion and sport), business, visiting friends or relatives and attending meetings or conferences.

Excursionist

Temporary visitor not making an overnight stay in the country.

ALAM SEKITAR

Environment

20. ALAM SEKITAR

PENGENALAN

Data berhubung dengan indeks pencemaran udara dan kualiti air sungai diperoleh daripada Jabatan Alam Sekitar.

Indeks Pencemaran Udara (IPU)

IPU menunjukkan status kualiti udara di stesen yang terpilih. Pada tahun 1993, Jabatan Alam Sekitar telah membangunkan sistem indeks kualiti udara yang pertama, dikenali sebagai Indeks Kualiti Udara Malaysia (IKUM). Pada pertengahan tahun 1996, selaras dengan keperluan untuk keharmonian kawasan dan perbandingan yang mudah dengan lain-lain negara ASEAN, IPU telah diterima pakai.

Bahan cemar udara yang termasuk di dalam IPU Malaysia adalah ozon (O_3), karbon monoksida (CO), nitrogen dioksida (NO_2), sulfur dioksida (SO_2) dan bahan zarah yang berukuran kurang dari 10 mikron (PM_{10}). Bagi menunjukkan status kualiti udara dan kesannya kepada kesihatan manusia, ukuran indeks dikategorikan sebagai berikut : baik, sederhana, tidak sihat, sangat tidak sihat, berbahaya dan kecemasan.

Pada masa kini, terdapat 50 stesen pemantauan berterusan di seluruh negara untuk memantau kualiti udara. Kebanyakan stesen tersebut terdapat di kawasan kediaman, sementara selebihnya di kawasan industri dan sekolah. Walau bagaimanapun, hanya stesen tertentu sahaja dilaporkan di dalam penerbitan ini.

Kualiti Air Sungai

Di bawah Program Pemantauan Kualiti Air Sungai yang dijalankan oleh Jabatan Alam Sekitar, contoh-contoh air diambil daripada stesen-stesen pemantauan dan dianalisa bagi menentukan Indeks Kualiti Air (WQI). Parameter yang dianalisa ialah keperluan oksigen biokimia (BOD_5), keperluan oksigen kimia (COD), *ammoniacal nitrogen* (NH_3-N), pepejal terampai, nilai pH air dan larutan oksigen (DO).

Setelah parameter dianalisis, kualiti air sungai akan diklasifikasikan kepada 3 kategori : bersih (**B**), sederhana tercemar (**ST**), tercemar (**T**) berpandukan pada jarak indeks WQI seperti 81 - 100 adalah bersih, 60 - 80 sederhana tercemar dan 0 - 59 tercemar.

20. ENVIRONMENT

INTRODUCTION

Data pertaining to air pollutant index and river water quality are obtained from the Department of Environment.

Air Pollutant Index (API)

The API shows the air quality status in the selected stations. The Department of Environment developed its first air quality index system, known as the Malaysian Air Quality Index (MAQI) in 1993. Later in 1996, in line with the need for regional harmonization and easy comparison with other ASEAN countries, the API was adopted.

The air pollutants included in Malaysia's API are ozone (O₃), carbon monoxide (CO), nitrogen dioxide (NO₂), sulphur dioxide (SO₂) and suspended particulate matter of less than 10 microns in size (PM₁₀). To reflect the status of the air quality and its effect on human health, the ranges of index values are categorized as follows : good, moderate, unhealthy, very unhealthy, hazardous and emergency.

Currently there are about 50 continuous monitoring stations to monitor the air quality throughout the country. Most of the stations are located in residential areas, while others are located within industrial areas and schools. However, only selected stations are reported in this publication.

River Water Quality

Under the River Water Quality Monitoring Programme by the Department of Environment, water samples are collected from the monitoring stations and analysed to derive the water quality index (WQI). The parameters analysed are biochemical oxygen demand (BOD₅), chemical oxygen demand (COD), ammoniacal nitrogen (NH₃-N), suspended solids (SS), pH and dissolved oxygen (DO).

Having analysed the parameters, river water quality is then classified into three categories : clean (C), slightly polluted (SP) and very polluted (P) depending on the index range of the WQI i.e. 81 - 100 is clean, 60 - 80 slightly polluted and 0 - 59 very polluted.

21. PELBAGAI

PENGENALAN

Bidang yang diliputi di dalam seksyen ini ialah maklumat tentang bilangan syarikat kerjasama termasuk keahliannya dan maklumat tentang bilangan perkahwinan yang didaftarkan.

KONSEP

Syarikat Kerjasama

Data berkenaan syarikat kerjasama disediakan oleh Jabatan Pembangunan Koperasi.

Bilangan Perkahwinan yang Didaftarkan

Data bagi bilangan perkahwinan yang didaftarkan dibahagikan kepada dua kategori, perkahwinan orang Islam dan bukan Islam.

Maklumat perkahwinan orang Islam yang berdaftar ialah pernikahan di antara rakyat Malaysia dengan rakyat Malaysia yang didaftarkan di Pejabat Agama Islam di peringkat daerah. Ini tidak termasuk pernikahan rakyat Malaysia dengan warganegara asing dan pernikahan rakyat Malaysia di luar negara.

Bilangan perkahwinan orang bukan Islam yang didaftarkan adalah diperoleh dari Jabatan Pendaftaran Negara. Sebelum 1982, perkahwinan didaftarkan di bawah akta berikut :

- (i) Ordinan Perkahwinan Awam 1952
- (ii) Ordinan Perkahwinan Berdaftar 1952
- (iii) Ordinan Perkahwinan Kristian 1956

Mulai 1982, penambahan dalam perkahwinan yang didaftarkan adalah disebabkan keperluan bahawa semua perkahwinan bukan Islam mesti didaftarkan mengikut peruntukan yang terkandung di bawah Akta Membaharui (Perkahwinan dan Perceraian), 1976.

21. MISCELLANEOUS

INTRODUCTION

The areas covered in this section are information on the number of cooperative societies including their membership and the number of registered marriages.

CONCEPTS

Cooperative Societies

Data on cooperative societies are provided by the Department for Cooperative Development.

Number of Registered Marriages

Data on the number of marriages registered are divided into two categories, Muslim and Non-Muslim marriages.

Data on Muslim marriages are marriages between Malaysian citizens registered at Pejabat Agama Islam at district levels. This does not include marriages between Malaysian citizens and foreigners and also marriages registered abroad.

Data on the number of Non-Muslim marriages are obtained from the National Registration Department. Before 1982 the marriages were registered under the following acts :

- (i) Civil Marriages Ordinance, 1952*
- (ii) Registered Marriages Ordinance, 1952*
- (iii) Christian Marriages Ordinance, 1956*

From 1982, the increase in the number of registered marriages is due to the requirement that all Non-Muslim marriages must be in accordance with the Provision contained in the Law Reform Act (Marriages and Divorce), 1976.

PENUNJUK SOSIO-EKONOMI

Socio-economic Indicators

22. PENUNJUK SOSIO-EKONOMI

PENGENALAN

Seksyen ini menyediakan data siri masa tentang penunjuk sosioekonomi terpilih bagi kebanyakan negara ASEAN, Jepun, Republik Korea, Amerika Syarikat dan United Kingdom. ASEAN yang merupakan satu Pertubuhan Negara Asia Tenggara termasuk Malaysia, Indonesia, Thailand, Filipina, Singapura, Brunei Darussalam, Vietnam, Myanmar, Kemboja dan Lao PDR.

KONSEP

Sumber utama bagi penunjuk ini diperolehi daripada penerbitan rasmi negara tersebut dan penerbitan antarabangsa yang dikeluarkan oleh Pertubuhan Bangsa-Bangsa Bersatu, Kumpulan Wang Antarabangsa dan Bank Pembangunan Asia.

Tahap kualiti dan perbandingan di antara penunjuk yang diberikan di sini dipengaruhi oleh beberapa faktor. Kaedah-kaedah anggaran pengumpulan data, tahap liputan serta penggunaan definisi mungkin berbeza dari satu negara dengan negara yang lain. Kebanyakan penunjuk yang dipersembahkan ini adalah merupakan indikator garis kasar sahaja.

22. SOCIO-ECONOMIC INDICATORS

INTRODUCTION

This section provides time series data on selected socio-economic indicators of most ASEAN countries, Japan, the Republic of Korea, the United States of America and the United Kingdom. ASEAN, which is an Association of the South East Asian Nations includes Malaysia, Indonesia, Thailand, the Philippines, Singapore, Brunei Darussalam, Vietnam, Myanmar, Cambodia and Lao PDR.

CONCEPTS

The principal sources for these indicators are primarily the official national publications of individual nations and from international publications issued by the United Nations, the International Monetary Fund and the Asian Development Bank.

The quality and the comparability of the indicators presented here are affected by a number of factors. The method of estimation, the method of data collection, the extent of coverage, and the definitions used may vary from country to country. Many of the measures shown are, at best, merely rough indicators of magnitude.
